Quality and Service

The quality nurseryman is a trained expert in horticulture. He is familiar with the habits and performance of most plants in his area, and is in a position to recommend those plants and trees which will do the most for your particular location. Only the highest grade nursery stock is handled by our firm. These plants have the finest root systems and will adapt themselves to new locations with the least setback from moving, thus performing for you as you expect them to perform. May we suggest that, whenever possible, you shop at our nursery during weekday mornings. This is the period when we are able to give you our undivided attention and help you with suggestions on the proper landscaping of your home. Also at this time we are in a better position to answer fully your many questions about specific plants and their care. However, should it not be convenient for you to see us weekdays, we will do our utmost to be as helpful as time will permit on weekends.

OUR GUARANTEE AND POLICY CONCERNING REPLACEMENTS

WE GUARANTEE OUR TREES TO BE TRUE TO NAME

If any proves otherwise we will replace it or refund the purchase price. We will not be liable for more than the purchase price.

WE GUARANTEE OUR TREES AND WOODY SHRUBS TO BE IN GOOD CONDITION

when sold and to commence growing if given proper care. If any fail to start growing after being properly planted and cared for, we will allow one-half the purchase price as credit on replacement. Any request for replacement shall be accompanied with the paid sales receipt and the tree or shrub.

In case the nurseryman is wholly satisfied the cause of loss was principally the nursery's and that tree had received completely proper care, full replacement will be made.

Trees and shrubs which are planted by the nursery crew will be replaced in full at the nursery, should they fail to grow if given proper care.

PROPER CARE INCLUDES

Protection against sun, wind, and frost before planting.

Prompt planting at correct depth.

Placing of any fertilizer at a safe distance from roots.

Choice of a location suited to the variety with respect to sun or shade, wet or dry soil, the possibility of frost damage, sufficient room to grow.

Generous use of peat moss and some acid fertilizer around acid-loving shrubs.

Regular cultivation and watering when needed.

Pruning, guying or spraying when needed.

Winter protection for semi-hardy varieties.

OUR NURSERYMEN ARE GLAD TO ASSIST YOU

with information regarding the special requirements of the trees you are purchasing as they apply to your location.

Often it will be wise to bring a snapshot or sketch of the area to be planted so we can better advise you. We sincerely want you to achieve excellent results with your trees and shrubs and are unhappy to see a fine tree fail due to improper circumstances.

TREES ARE LIVING, BREATHING, GROWING THINGS

that with a little care will give beauty and satisfaction for many years.

PLANT CAREFULLY! CARE FOR THEM! ENJOY THEM!

PLANTING

INFORMATION..... 3, 7, 20

MANY VARIETIES OF SHRUBS AND TREES not listed in our catalog will be found at our Nursery. Please let us know what you are interested in and we will do our best to supply it.

HOW TO PLANT

BALLED TREES AND SHRUBS

Balled plants should be handled by lifting the ball and not the top.

Dig a hole large enough to hold ball and permit firming the earth around it. Place plant with top of ball even with the surface of the ground. Do not remove burlap. Fill in about $\frac{1}{3}$ with soil, then cut top string and fold back corners of burlap. Fill the hole with water and, when soaked in, throw in the remainder of the soil. Firm the soil well, leave a shallow basin and fill again with water. Water again to assure thorough soaking of the ball. Do not rely on sprinklers or sprinkling system to do this until plant is well established.

Use care in placing fertilizer of any kind in the hole when planting. Small quantities of fertilizer may be applied when plants are thoroughly established and growing.

CANNED TREES AND SHRUBS

When plants are in cans, they may be removed by cutting down two sides of the can with tin snips or chisel and pulling the sides apart so that the can comes off easily. Handle so as not to break open the ball of earth.

Pots may be removed by the following method: Place four fingers against the surface of the soil, invert the pot, tap lightly against something solid and out come the contents in your hand in one solid piece.

In every case, the soil in the container should be fairly moist so that it will hold together and care should be used to keep all the earth possible on the roots.

For plants in gallons and 6-inch pots, dig a hole approximately 15 inches by 15 inches. For plants in 5-gallon or 9-inch pots, dig a hole approximately 24"x24".

In all cases, plants should be planted in the ground at about the same level as they were in the container.

After the hole is partially filled, use water generously before filling the hole with top soil so that the water will settle the soil and eliminate all air pockets.

Lift ball not top

Place ball in hole of generous size

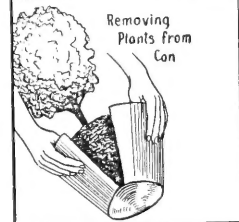

Loosen Burlap Around Top

Fill to $\frac{1}{3}$

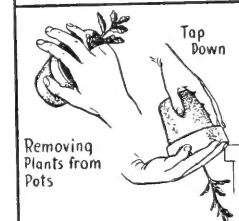

Mound to Allow for Settling
Rim to form Basin
Fill with Soil Pack Well

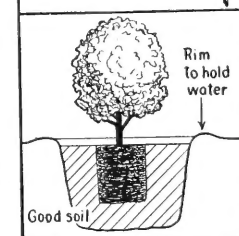

Tools for cutting can

Cut back extremely long roots

Soil level

Strawberry planted correctly

CARE AND PLANTING OF CANE BERRIES AND SMALL FRUITS

CARE AND PLANTING OF GRAPE VINES

Plant grape vines in full sun 8 feet or more apart.

Dig a hole no less than 1 foot wide and 2 feet deep. Before planting the vine cut back basal roots to 5 inches and remove all others. Cut back top to 2 or 3 eyes.

Plant vine deep enough to leave the bottom eye just above the surface of the ground, and loose top soil placed around the roots. Fill in hole and water immediately.

CARE AND PLANTING OF STRAWBERRIES

Set crown at surface of deeply spaded soil. Leave soil loose; remove all young leaves, leaving 2 or 3 of the older ones. Cut back roots. Water well.

CARE AND PLANTING OF BUSH FRUITS

Currants and Gooseberries

Set 2 or 3 inches deeper than in nursery. Cut off $\frac{1}{2}$ the tops, plant 4

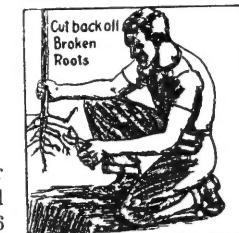

to 5 feet apart, cultivate. Every year after fruit is gathered cut out and burn all wood 3 years old. Let 5 or 6 new shoots come each year.

Raspberries and Blackberries

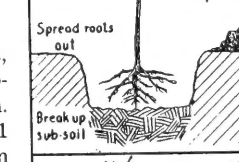

Plant in good soil 3 or 4 feet apart, in rows 6 feet apart. Set Black Raspberries so bud is covered just 1 inch. Firm soil. Red Raspberries, plant 1 to 2 inches deeper than they were in nursery. Cut back all raspberries as soon as planted to 6 inches above ground. After fruiting cut out all odd canes and burn, leaving 4 or 5 strong new canes.

Bare-Root FRUIT TREES

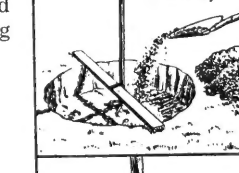

Plant in sunny well drained soil. Break up subsoil and thoroughly pulverize top soil. Use no fertilizer at planting time. Prune and plant as shown in illustrations at right. Settle the dirt by slowly running water into basin. Follow by another heavy watering in two days after planting.

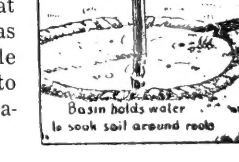

Cut back all Broken Roots
Trim Top back, too this will encourage good root development

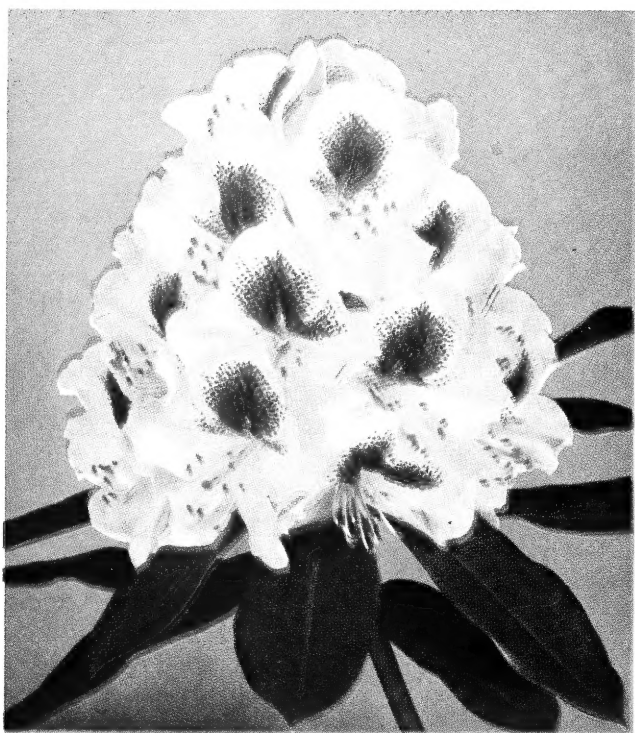

Spread roots out
Break up sub-soil

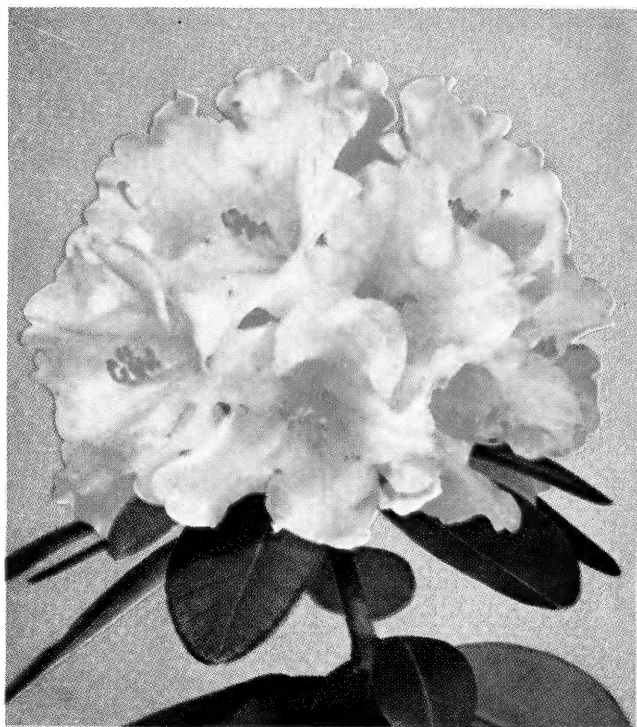

the Tree should be at the same depth it was in nursery

Basin holds water to soak soil around roots

RHODODENDRON SAPPHO

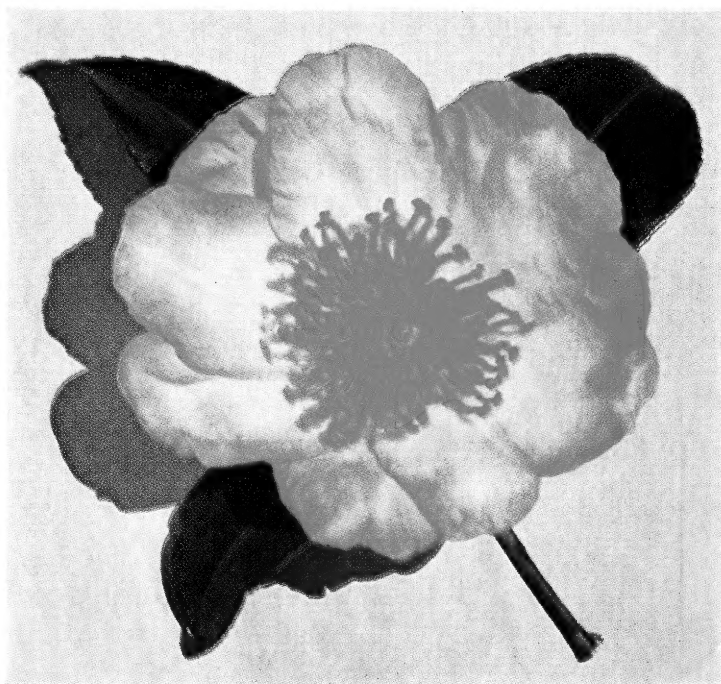

RHODODENDRON UNIQUE

Plant Year 'Round Beauty with RHODODENDRONS and CAMELLIAS

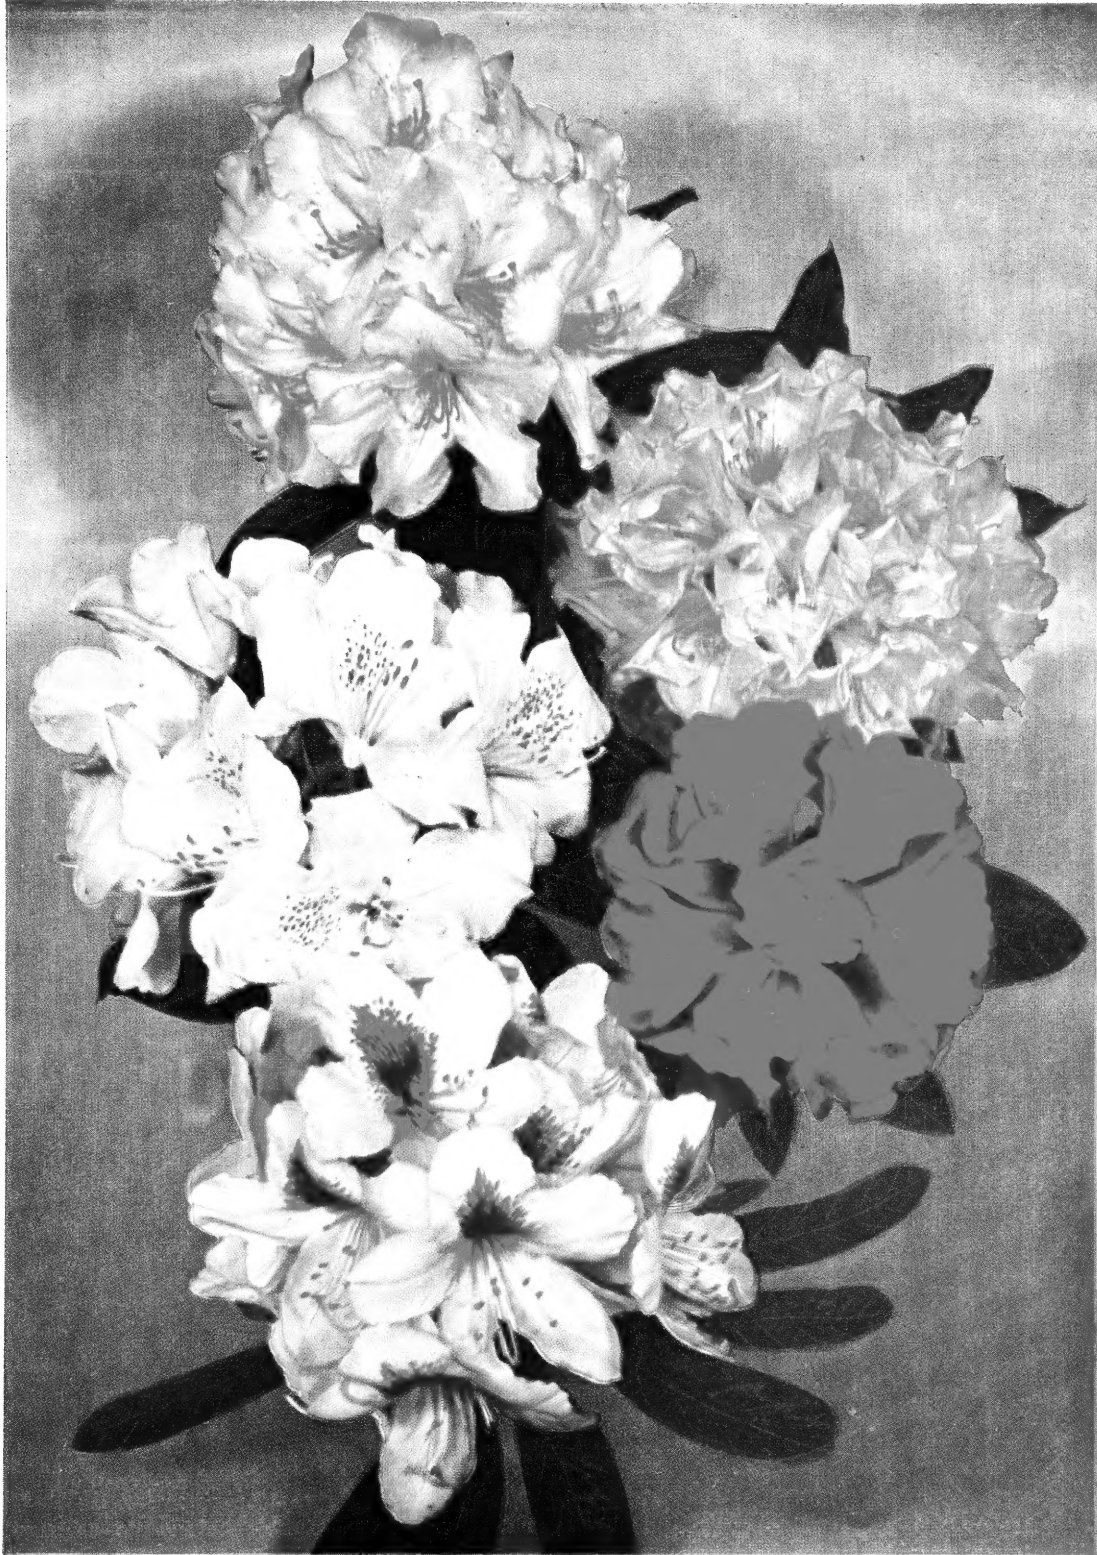

CAMELLIA ALBA PLENA

SASANQUA CAMELLIA HANA JIMAN

RHODODENDRONS, Evergreen... Colorful

Superbly adapted to the growing conditions that prevail in the Northwest, Rhododendrons have become one of the most important groups of shrubs for landscaping in this area. If you want to treat yourself to one of the finest sights a garden can provide, plant Rhododendrons of several different colors, including yellow or purple, in a group. The effect can be breathtaking.

Landscaping with CAMELLIAS

Camellias are prized in Northwest gardens for their habit of blooming in late winter and early spring, and their glossy evergreen foliage which is attractive the year around. All have lovely blooms which find many uses in corsages and flower arrangements. Camellias make beautiful hedge plantings and also as separations between house and service yard as well as lovely outlying yard planting. Camellias are also beautiful when planted along fences. By choosing early, medium, and late flowering varieties, camellias can be planned to give beautiful blooms from fall through spring. We will be happy to assist in your choice of varieties. Another interesting and new way to use these versatile plants is to train them in espalier form along fences and the sides of the patio. With the proper care they will become not only beautiful specimens but will provide superb evergreen foliage the year around.

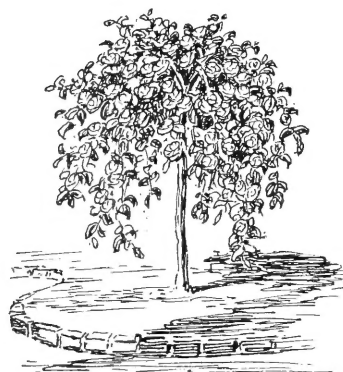

HEDGES

TUBS

CLIMBING

WEeping

GROUP I

12-15" \$3.00, 18-24" \$4.75

Debutante. One of the finest new varieties with beautiful fully double ball shaped flowers of a delicate shade of pink. Ideal as a corsage flower.

Chandleri elegans. Largest and most popular peony-flowered Camellia. Broad blooms with a center of tightly curled petals. Color soft rose, often relieved with splashes of white.

Cheerful. Masses of rosy red blooms produced in great abundance.

Herme. Delightfully fragrant flowers 5 to 6 inches across. Semi-double, petals broad, large, light pink with an irregular border of white around each.

Pink Perfection. Symmetrical double blooms of clear light pink. A very popular old variety.

Purity. Large snow white double blooms, often 6 inches across. Perhaps the most popular white.

Wakanoura Red. Large slightly cupped semi-double blooms of rich red color.

GROUP II

12-15" \$3.50, 18-24" \$5.75

Alba Plena. Finest of all white Camellias. Fully double flowers often 6 inches across. Lovely and delicate. Also available in fimbriated form. E.

C. M. Wilson. A beautiful blush pink sport of Chandleri Elegans. A new and outstanding variety.

Colonel Firey. Perhaps the finest red Camellia. The glowing crimson blooms, of flat and symmetrical form, are often 6 inches across.

Grandiflora Rosea. One of the finest deep pink semi-double camellias. From salmon-rose to bright, deep pink. Very large with a column of stamens in the center. Vigorous, spreading bush with large shining deep green pointed foliage.

Kumasaka. Very large double salmon pink blooms late in the season.

Hana Jiman. Large single white, tipped with pink. Fluted petals. Vigorous, upright and compact. A Sasanqua camellia.

SASANQUA CAMELLIAS

Sasanquas thrive in full sun or a partially shaded area and may be used as hedges, ground cover, vines or specimens. Care and culture of the Sasanqua is identical to that of the Japonica. Its hardiness, profusion of bloom from fall through spring and the dark evergreen foliage make it most desirable. The single forms are especially beautiful and ideal to train in espalier form.

PLANTING AND CARE OF CAMELLIAS

Select a semi-shady position protected from the hot sun. A spot beneath trees where the plants get some morning sun and filtered sunlight the rest of the day is ideal. Complete shade the entire day should be avoided.

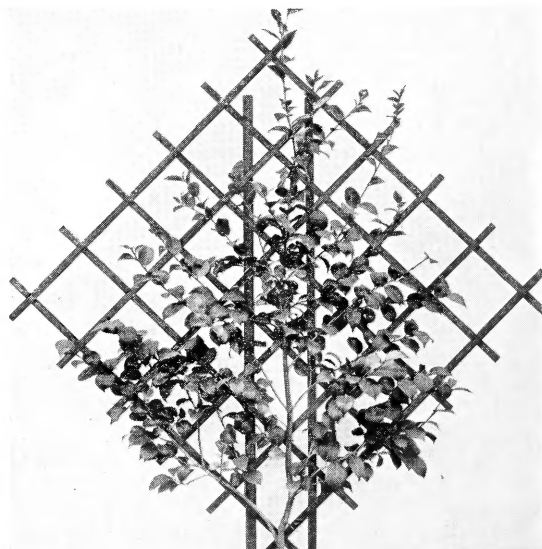

A loose, well-drained soil, containing $\frac{1}{3}$ garden loam, $\frac{1}{3}$ leaf mold and $\frac{1}{3}$ thoroughly moistened peat moss is ideal. Where leaf mold is not available add more peat.

Dig a hole 12 to 18 inches wider and 3 to 4 inches deeper than the root ball. Fill in bottom with a good soil mixture and place the top of the root ball even with the ground level. Soak the plant well and also water top and bottom.

Apply acid fertilizer right after blooming and in August. Apply fertilizer to damp soil and water in well.

Camellias should never be cultivated over $\frac{1}{2}$ inch deep. Mulch to keep roots damp and cool.

Camellias love lots of water but the soil must be well drained. Sprinkle ground and leaves every night during the hot summer.

ESPAlier

WE HAVE SPECIMEN PLANTS OF
MANY FINE CAMELLIAS
PLEASE INQUIRE

SMALLER SIZES AND SPECIMEN PLANTS AVAILABLE AT OUR NURSERY

RHODODENDRONS

15-18" \$6.00, 18-24" \$7.50

GROUP I

Betty Wormald. Large trusses of pink flowers showing a pale purple blotch on the upper petal.

Cynthia. One of the most brilliantly colored Rhododendrons. The rosy carmine blooms are carried in large shapely trusses.

Eureka Maid. Deep rich pink blooms carried in large conical trusses. Excellent compact growth.

Jan Dekens. Huge trusses of deep pink open fringed blooms. Attractive large deep green wavy leaves. Compact plant.

Loder's White. Frilled white blooms, opening shell pink. Forms a large, vigorous, spreading plant.

Lord Roberts. One of the finest dark reds. Medium sized trusses in abundance on compact plants. Good foliage.

Mrs. A. T. De La Mare. Enormous trusses of white flowers with a green spot on the upper petal. Strong grower. Good foliage.

Mrs. G. W. Leak. Tall trusses of pink flowers, each with a purplish brown blotch on the upper petal. A most attractive variety.

Pink Pearl. The most popular and widely known pink variety. Big light clear pink flowers on large conical trusses. Robust plant with excellent foliage.

Sappho. Perfect trusses of large glistening white flowers with deep purple blotch. Very striking. Tall grower.

Unknown Warrior. Fiery red blooms in good sized trusses on sturdy compact plants. Dark green elongated foliage.

Vulcan. Another hybrid which reflects good breeding and has performed admirably for us in cold weather. A medium

Care and Planting of Rhododendrons, Heathers, Azaleas, other Broadleaf Evergreens

Rhododendrons and Azaleas prefer an acid soil, well drained, loose and friable. A generous application of peat moss and leaf mold should be worked thoroughly into the soil. When the soil is very stiff and heavy it should be replaced with good top soil. Shot clay, sandy loam, or peaty soil are all suitable for this purpose.

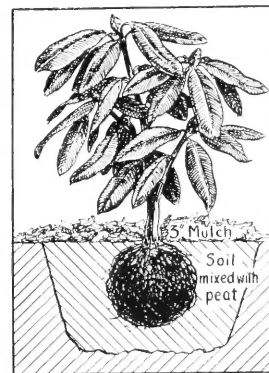

To plant dig a hole considerably larger than the root ball. Fill in the bottom of the hole with a mixture of equal parts of loam and peat moss. Then place the plant in the hole so that the top of the root ball is not more than 1 inch below the level of the surrounding soil. Fill in the sides with the same mixture, firming it down well to avoid air pockets.

After planting soak the soil thoroughly.

Mulch the ground around the plants with an ample layer of peat, leaf mold, sawdust or other porous substance.

Rhododendrons and Azaleas require ample moisture. Water frequently during dry weather and during warm weather. An overhead sprinkling morning and evening will be beneficial.

The ideal site for Rhododendrons and Azaleas is one that provides some protection from the hottest sun and severe winds.

compact shrub with dark green pointed leaves and numerous rounded trusses of bright red flowers.

GROUP II

15-18" \$7.50, 18-24" \$9.00

Blue Peter. Large but tidy trusses of lavender blue flowers touched with purple on the upper petals. Excellent foliage. Spreading habit.

Brittania. Bright crimson blooms in large clusters.

Earl of Athlone. Tight trusses of red blooms. A high ranking variety with good foliage and blooming habits.

Goldsworth Yellow. Very free flowering and compact. One of the finest types. The flowers are a beautiful apricot color.

Jean Marie de Montague. Attractive foliage and trusses of bright crimson blooms on a well shaped bush. Excellent foliage.

Purple Splendor. Rich deep royal purple. The finest of this color in existence.

GROUP III, Dwarf Varieties

12-15" \$7.50, 15-18" \$9.00

Bowbells. Neat rounded leaves and graceful bell shaped flowers of soft pink. The young growths which follow are a striking bronze—much like the young shoots of Pieris.

Blue Tit. An outstanding hybrid of dense low growth, rarely exceeding 3 feet in height. The numerous light blue flowers appear in early April. The plants are most effective when planted in groups and allowed to form a solid mass. This variety makes an admirable small informal planting.

Unique. Tidy trusses of deep cream flowers, flushed apricot are borne on the neat rounded bushes.

Plant AZALEAS for Brilliant Color Display in Spring

Abundance of bloom, brilliancy of color and attractive habit of growth all combine to make Azaleas ideal shrubs for Northwest gardens. They revel in our acid soil and each spring burst forth in a blaze of color unrivaled by anything else in the garden. The lower growing evergreen kinds may be used for edgings or in broad masses, while the taller deciduous sorts are especially suited for interplanting with evergreen shrubs.

EVERGREEN

8-10" \$2.00, 10-12" \$2.75

Coral Bells. Dainty pink blooms on plants of compact yet graceful habit. The blossoms are semi-double or Hose-in-Hose type.

Hinodegiri. Compact plants with dense masses of brilliant red blooms in early spring.

Ledifolia alba. The whole plant is covered in late April with large, white, delicately scented blooms. Forms a beautiful, rounded shrub.

Macrantha. Low spreading bush completely covered with salmon pink flowers in June.

Sherwood Red. Compact shrub with gorgeous red blooms in early spring. Hardy and very showy.

GABLE HYBRIDS

This new strain of Azaleas is the hardiest of the evergreen type. They will live in temperatures down to -10 degrees. They bloom in late April and May. Available colors are soft purple, pearl pink and salmon pink.

GLENDAL HYBRIDS

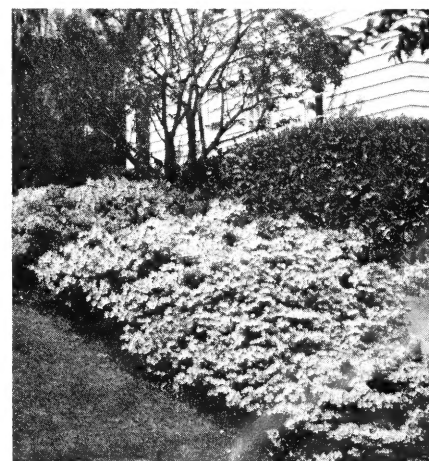

6-8" \$2.25, 12-15" \$3.50

This group of new Azaleas is excellent for use in partial shade or full sun. Colors are clear and bloom ranges for 2 to 3 weeks in May. Many colors are available ranging from white through deep red.

DECIDUOUS

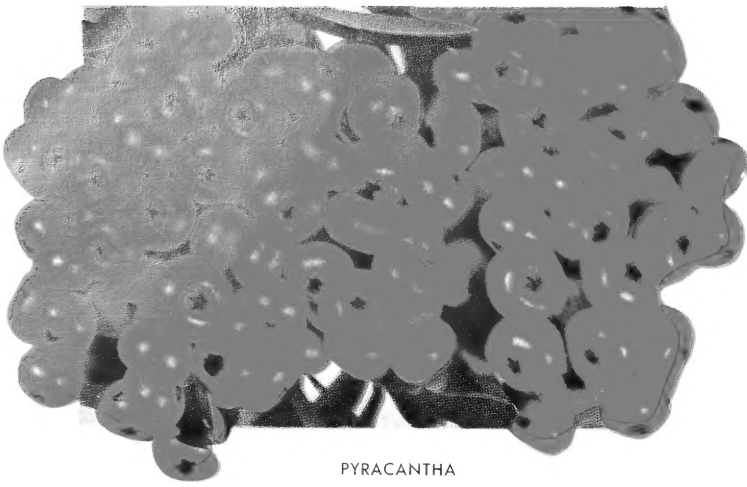

10-12" \$2.50, 15-18" \$3.50

Altaclarensis. A vigorous grower with masses of bright orange-yellow blooms in May.

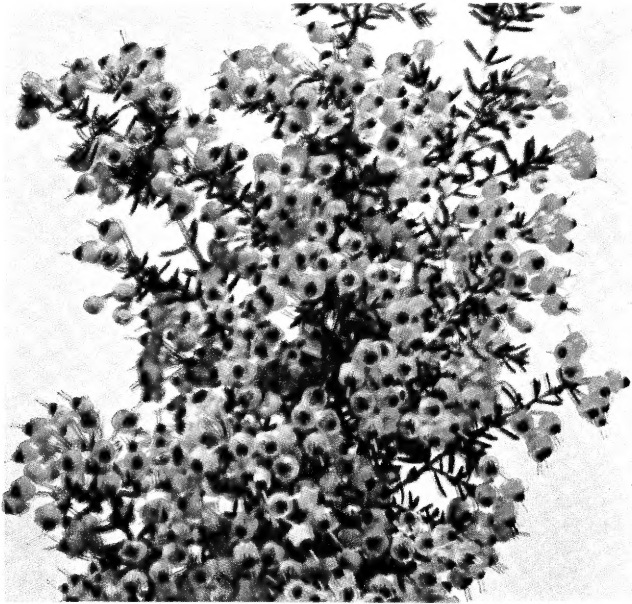

PLANTING OF AZALEAS

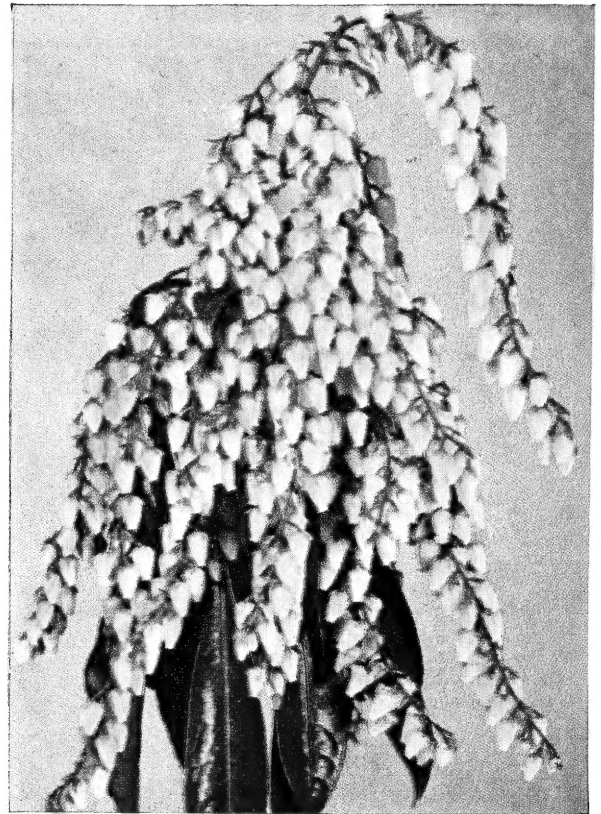

BROADLEAF EVERGREENS

PYRACANTHA

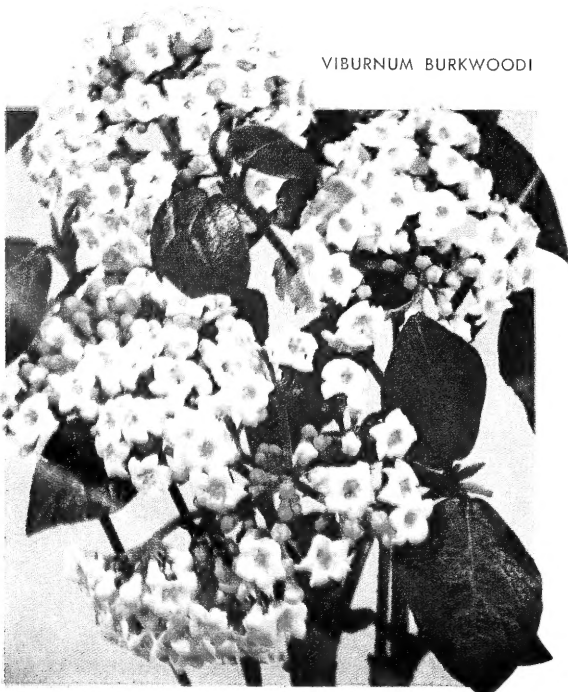

HEATHER

ANDROMEDA JAPONICA

ABELIA EDWARD GOUCHER

VIBURNUM BURKWOODI

BROADLEAF EVERGREEN FLOWERING SHRUBS

Most of the shrubs used in planting about the house in the Pacific Northwest are found in this group. They are of year 'round good appearance. Most of them are desirable for their foliage alone and display interesting and often very showy flowers. Some are more useful for their foliage effect. They offer, as a group, subjects for all purposes: foundation plantings, screens, hedges and some are large enough for planting as small trees. Included in the kinds we offer are many varieties which make a cheerful display of berries in the fall and winter. Some are adapted for growing in shady situations while others will thrive in the sunniest spots. We will be glad to suggest suitable kinds to fill your special needs.

ABELIA

Glossy Abelia. *Abelia grandiflora*. Graceful evergreen shrub with arching branches, bronzy foliage and dainty fragrant white bells in summer and autumn. Sun or light shade.

18-24 in. \$2.25

Edward Goucher. Pinkish lavender bells in summer. Excellent foliage, compact habit of growth.

18-24 in. \$2.50

ANDROMEDA

Lily of the Valley Shrub. *Andromeda japonica*. Low evergreen bush to 4 feet high. The leaves are bronzy pink when young, turning to medium green as the leaves mature. Pendant clusters of white Lily-of-the-Valley-like flowers in early spring.

12-15 in. \$3.00, 15-18 in. \$3.75

AUCUBA

Aucuba japonica variegata. **Gold Dust Plant.** An excellent shrub for shaded places. The large glossy pointed leaves are spotted or speckled with gold. Bright red berries in fall provided pollinizer is planted nearby. Will grow in the deepest shade.

15-18 in. \$3.00

Aucuba japonica, Green. Like the above but with entirely green leaves. Bright red berries in fall. Requires a pollinizer.

15-18 in. \$3.00

Pollinizer. Does not have berries but necessary to pollinize the above varieties. Attractive foliage.

15-18 in. \$3.00

COTONEASTER

Very useful group of shrubs with white flowers and pretty red berries that lend attractive color to the garden. Many have distinctive growing habits which adapt them nicely to rock gardens, bank plantings or in front of other shrubs, but especially among rocks. The taller kinds make good all around ornamental shrubs.

Cotoneaster Dammeri. Flat, evergreen, hardy and vigorous shrub. Will grow in sun or shade, moist or dry soil.

9-12 in. \$1.50

Cotoneaster Franchetti. Tall shrub with arching branches. Small pink flowers are followed by red tinged orange berries.

15-18 in. \$2.50, 2-3 ft. \$3.50

Cotoneaster henryi. Gracefully arching branches clothed with attractive evergreen leaves and bearing clusters of bright red berries.

15-18 in. \$2.50, 2-3 ft. \$3.50

Cotoneaster horizontalis. Densely twiggy, nearly horizontal habit, heavily studded with red berries in the fall and winter. Semi-evergreen, the leaves turn red and orange at frost time. Excellent for steep banks, walls.

15-18 in. \$2.50

Cotoneaster microphylla. A vigorous procumbent, spreading shrub with small dark green leaves and rosy crimson berries in fall and winter. Adapted to dry banks and poor soil.

15-18 in. \$2.50

DAPHNE

Daphne odora. Dense low shrub with rich green leaves, often margined cream, and clusters of exquisitely fragrant waxy white or pink flowers in late winter and early spring. At its best in lightly shaded situations.

15-18 in. \$3.50

Daphne cneorum. **Rock Daphne.** Very low shrub with fine leaves and numerous clusters of very fragrant bright pink flowers in early spring. One of the showiest and choicest of the smaller shrubs. Ideal for rock gardens.

6-9 in. \$1.75, 9-12 in. \$2.25

Daphne Somerset. Rosy-pink flowers at the ends of the branches in spring. This evergreen has a smaller leaf and more open form than other forms of daphne. Hardy.

15-18 in. \$3.50

NANDINA (Heavenly Bamboo)

Nandina domestica. The foliage resembles a small Bamboo in many ways. Leaves light green tipped with pink and copper in early spring, becoming vivid red in autumn. Large showy clusters of bright crimson berries.

FIRETHORN (Pyracantha)

These are strong growing shrubs with erect or spreading branches and narrow dark green leaves and clusters of white flowers in spring. The real glory of these shrubs is the colorful abundance of berries in fall and winter. There are a number of excellent varieties available: **Lalandi**, **Rosedale's**, **Duvali**, and **Government Red**.

2-3 ft. \$3.25

LAUREL

Prunus Zabeliana. A new and valuable broadleaved shrub. A moderate growth with wide spread, but can be held low by removing the branches that grow upward. The leaves are only half the width of English Laurel.

15-18 in. \$2.75

LAURESTINUS

Viburnum Tinus, Laurestinus. A rounded shrub with deep green oval leaves and a great profusion of flat clusters of white flowers in early spring. The pink cast of the unopened buds lend another note of color. A vigorous growing shrub.

15-18 in. \$2.50, 24-30 in. \$4.25

HEATHER

Heathers are among the most desirable of the low growing shrubs for Pacific Northwest Gardens. A proper selection will give you blooms almost the year around. The double forms of Scotch

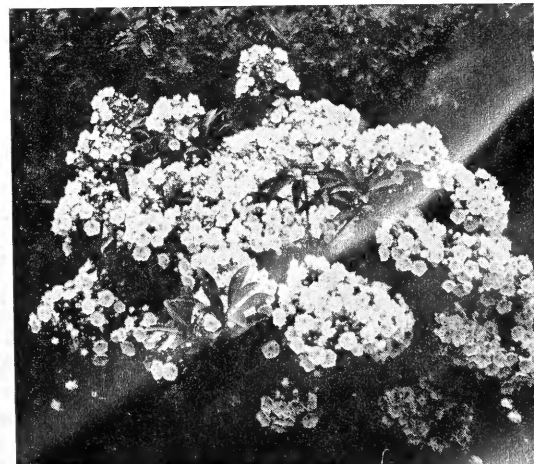

KALMIA, MOUNTAIN LAUREL

DAPHNE ODORA MARGINATA

LAURESTINUS

HEATHERS (Cont'd)

Heather bloom in the summer and are choice for cut flowers. The **Irish Bell Heather** also blooms in summer; both purple and white kinds are available. The various forms of **Erica vagans**, the Cornish Heath, produce their brilliant flowers in late summer and should not be overlooked. For winter and early spring blooms we recommend **Erica carnea** in one or more of the pink forms, planted in combination with **Springwood White**. We usually have a number of the better kinds on hand.

Heathers are especially recommended for planting in moist ground in sunny situations where they will thrive with little care and produce blooms in greatest profusion. Also they are ideal for planting under windows where their low habit and cherry bloom are always pleasing. Use them for bank covering or plant in drifts.

Erica Maxwell. Dwarf growing; blooms in August; red flowers.

Erica Mediterranean Hybrid. Vigorous but compact fine leaved shrub with masses of pink flowers all through the winter and into spring.

Approximately 6 in. diameter 75c ea., 1 doz. \$8.00, 2 yr. 9-12 in. \$1.25
Larger plants available.

KALMIA

Kalmia latifolia. Mountain Laurel. A shrub of moderate growing habit, which bears clusters of pink blooms like inverted umbrellas in mid-spring. The foliage is attractive the year around. Does best in light shade. An altogether choice and desirable shrub.
15-18 in. \$4.00

MEXICAN ORANGE

Choisya ternata. Bright green three-parted foliage on neat rounded shrub of good proportions. Grows readily in sun or shade. Clusters of fragrant white flowers in spring.
15-18 in. \$2.50, 24-30 in. \$4.25

PERNETTYA

Pernettya mucronata. This sprightly shrub is covered with small shiny leaves and loaded with clusters of brightly colored berries. Available in various colors. May be kept very compact by trimming. Requires a pollinizer.

12-15 in. \$2.50, 15-18 in. \$3.50

OSMANTHUS

Osmanthus Delavayi. Shrubby osmanthus, making a graceful shrub covered with small oval or rounded leaves of deep green. Spring brings forth clusters of fragrant white flowers.

9-12 in. \$2.75, 15-18 in. \$3.50

PHOTINIA

Photinia Serrulata, Chinese Photinia. Large, broad toothed leaves which often assume pretty red or bronze tints, especially when young or during cold weather. Large flat clusters of white flowers in April and May followed by red berries.

18-24 in. \$3.25

Photinia glabra. Smaller leaved than the above, but with equally vivid coloring. The new leaves are glowing coppery scarlet, changing to copper, bronze and deep green as the season progresses. Frequent pruning assures a compact bush.

12-15 in. \$2.50

RAPHIOLEPIS

Raphiolepis Ovata. A slow growing shrub of good habit. Heavy dark green foliage assuming bronzy winter tints. White flowers in the spring are followed by blue berries.

8-10 in. \$2.00, 18-24 in. \$4.25

SARCOCOCCA

Sarcococca Ruscifolia. Medium size shrub (4 feet), attractive dark green shiny rounded leaves. Useful in partially shaded places as foliage shrub, the beauty of which is augmented by fragrant white blossoms and dark scarlet berries.

6-9 in. \$2.00

SKIMMIA

Skimmia japonica. Useful low shrub for shade with attractive foliage. White star shaped flowers followed by clusters of large bright red berries. Requires a pollinizer.

12-15 in. \$2.75

STRANSVAESIA

Spreading shrub. The new leaves are bronzy, maturing to a soft green. Flowers white, followed by red berries in clusters, giving color throughout the winter.

18-24 in. \$2.75, 3-4 ft. \$3.50

VIBURNUM

Viburnum burkwoodi. The glory of this shrub is its clusters of pink and white fragrant flowers in earliest spring. Almost evergreen, although it will drop some of its foliage in cold weather.

18-24 in. \$3.00

Viburnum davidi. A very handsome evergreen of low growth with unusually distinctive dark green ribbed leaves. Attractive pinkish-white flowers in summer. Thrives in sun or light shade. Plant at the terrace edge, along walks, by doorways.

6-8 in. \$2.00, 10-12 in. \$3.50

VERONICA

Veronica Autumn Glory. Low tidy plant with cone shaped clusters of bright lavender-blue flowers in summer. Will bloom until frost if the spent flowers are pruned off.

9-12 in. \$1.25

GROUND COVERS

Ajuga. Excellent for all areas. Has beautiful green foliage and blue flowers in early summer. \$3.00 per flat

Thyme. Red, pink, white, wooley, each variety has its own foliage color.

Ceanothus Gloriosus. Dwarf mountain lilac. Beautiful clusters of blue flowers in spring. 9-12 in. \$1.50

Cotoneaster Humifusa Dammeri. Flat, evergreen, hardy and vigorous shrub. Will grow in sun or shade, moist or dry soil. 2 in. pots 50c

Vinca Minor. Dwarf plant with small leaves. Blooms in early spring and again in fall. Should have some shade. \$3.50 per flat

Heathers. For description see p. 9.

Evergreen Azaleas. See page 7.

Sarcococca Hookeriana Humilis. Glossy blue-black fruits on a slow growing spreading bush. 1-gal. cans \$1.50

Pacysandra. Hardy perennial herb with clean, crisp, evergreen foliage. 20c per division.

Kinnikinnick. Spreading prostrate evergreen with pink or white bell shaped flowers followed by clusters of large red berries. Does well in sun, will tolerate shade and thrives on dry gravelly banks. 2 in. pots 50c

HEDGE PLANTS *for attractive living fences . . .*

Priced per each in lots of 10 or more

Berberis Verruculosa. 10-12 in. \$2.50, 15-18 in. \$3.50

Boxwood Truetree. Grows to 4 feet. Small dark green leaves. 9-12 in. 75c, 15-18 in. \$1.25

Boxwood Truedwarf. Low growing box suitable for low hedges and edgings.

Cotoneaster Franchetti. 2-3 ft. \$3.15

English Laurel. Evergreen hedge plant. Large glossy green leaves. Robust grower. 9-12 in. 35c, 18-24 in. \$1.25

English Privet. An old standby for hedges. Dense twiggy growth and somewhat smaller leaves than the California Privet. 18-24 in. 22c, 24-30 in. 26½c

Escallonia for colorful flowers. 2-3 ft. per ten \$2.25 each.

Floribunda roses for a beautiful effect. See rose listing, page 23.

Multiflora roses for massive areas. 9 cents

Portuguese Laurel. 15-18 in. \$2.50

Pyramid Arborvitae. 24-30 in. \$3.50

Viburnum Burkwoodi. 18-24 in. \$3.15

There are several other types of coniferous and broadleaf evergreens suitable for hedges.

ESCALLONIA HEDGE

ALL PRICES F.O.B. OUR NURSERY

RED LEAVED BARBERRY

HYDRANGEA

LILAC

DECIDUOUS FLOWERING SHRUBS

2-3 ft. \$1.50, 3-4 ft. \$2.50, except as noted.

This group of shrubs contains many of the indispensable favorites such as Lilac, Forsythia (Golden Bells), and Spiraea. Every garden should contain at least a few of these popular beauties. They will contrast effectively with the evergreens and contribute their special touch of grace and beauty to the borders of a well planned garden.

BEAUTY BUSH

Kolkwitzia amabilis. A graceful shrub with fine foliage and masses of pink flowers on the slender arching branches.

BUDDLEIA

Butterfly Bush. Long spikes of fragrant flowers on arching branches. A fast growing shrub that will quickly form a screen. It is usually desirable to cut this shrub back severely in the winter. Available in **Pink, Wine Red and White.**

BARBERRY

Red Leaf Barberry (*Berberis thunbergii atropurpurea*). Rich lustrous bronzy-red foliage and brilliant red berries. Dense bushy shrub best in full sun.

FORSYTHIA

Spring Glory. A spectacular new Forsythia which bears masses of much larger blooms than older varieties. Brilliant large yellow florets completely cover the branches.

HYDRANGEA

Otaksa (*Hortensis*). Forms a rounded shrub 3 to 5 feet high covered in early summer with large trusses of pink or blue flowers. Blue results from keeping soil acid. Sweet soil keeps them pink. 2 yr. plants \$2.25

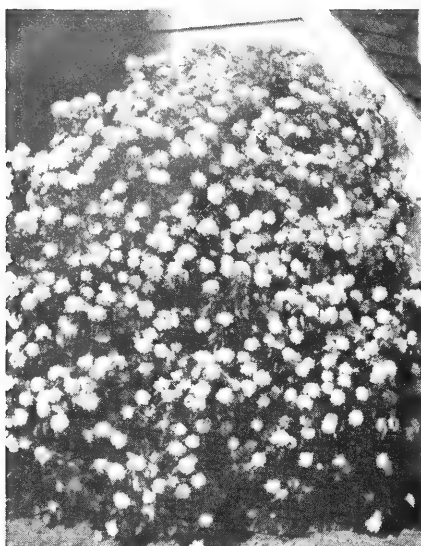

Pee Gee (*Paniculata grandiflora*). A vigorous shrub which bears its huge panicles of light blooms in August and September. Available in both tree and bush form.

Tree form 3 4 ft. \$3.50
Bush form 2-3 ft. \$1.50

at Our
Nursery

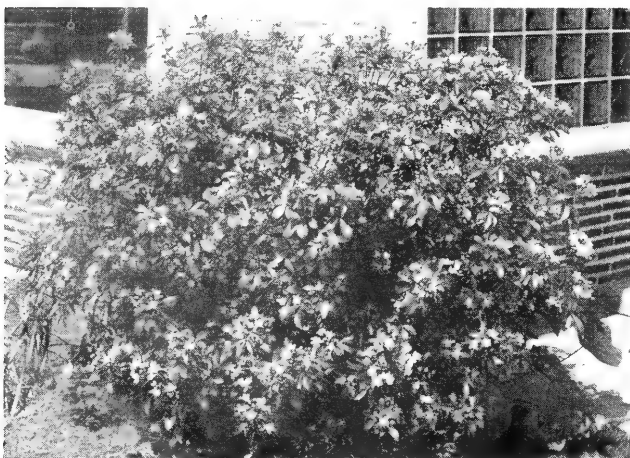

FLOWERING QUINCE

SNOWBALL

WEIGELA EVA RATHKE

MEXICAN ORANGE

DECIDUOUS FLOWERING SHRUBS – Continued

2-3 ft. \$1.50, 3-4 ft. \$2.50 except as noted

FLOWERING QUINCE

A low to medium height shrub with interesting branching habit and masses of blooms on the otherwise bare stems in late winter and early spring. Excellent in flower arrangements and beautiful espaliered against a wall. The new varieties we offer bloom while quite young and come in many colors such as pink, white, red and apple blossom.

Apple Blossom, Crimson King, 2-3 ft. \$2.50

DAPHNE

Daphne mezereum, February Daphne. Upright stems heavily set with fragrant rosy-purple blooms in late winter, followed by showy red berries in fall.

MOCKORANGE

Virginale. Upright shrub with large white fragrant blooms in late spring and early summer.

Minnesota Snowflake. Similar to Virginale except has a mass of tiny white blossoms in spring.

SNOWBALL

Common Snowball. A famous old favorite with multitudes of round heads of pure white bloom in spring.

Viburnum Carlesi. Round heads of fragrant light pink flowers in early spring. An especially choice shrub that should be in every garden. 3 to 4 feet high. 12-15 in. \$3.00

Viburnum tomentosum. Sweeping horizontal branches wreathed in spring with flat clusters of snowy white flowers followed by clusters of red berries. Attractive neat foliage. Singularly decorative. 18-24 in. \$2.50

LILACS

We stock the French Hybrid Lilacs in a number of fine varieties including all the popular colors. There are many outstanding single lilacs available as well as the doubles. Lilacs should be planted in full sun in a slightly alkaline soil.

2-3 ft. \$2.50 and up

TAMARIX

Hispid. Foamy masses of soft lavender pink flowers in mid-summer. Feathery gray foliage. May be cut to the ground each winter if desired.

Africana. Masses of feathery pink bloom in spring. Grows to about 10 ft.

WEIGELA

Eva Rathke. Deep green foliage and masses of ruby red trumpet shaped flowers in spring and early summer. 15-18 in. \$1.50

Weigela rosea. Taller, with masses of light pink flowers in spring and early summer.

Bristol Ruby (Pat. 492). Rich ruby red flowers all summer. One of the best red varieties yet developed. Hardy. Sun. 2-3 ft. \$2.00

SPIRAEA

Anthony Waterer. Low growing, rather dense bushes sprinkled all summer long with flat heads of deep rose blooms. 15-18 in. \$1.50

Thunbergi. A dainty, graceful shrub with slender arching branches which are covered in spring with tiny white flowers. Bright green feathery foliage.

Van Houttei. A robust favorite with arching branches loaded with heads of white flowers in spring. Excellent where an informal flowering hedge is desired.

Prunifolia. A rather slender shrub with showy masses of white flowers in spring.

SPIRAEA THUNBERGI

FLOWERING AND SHADE TREES

Flowering and shade trees are really the backbone of a well planned garden. Trees planted in the parking strip cut down the glare and heat from the street and deaden traffic noises. Trees provide ideal background for shrubs and other plants; provide shade for the garden living areas. The flowering trees produce a display of color unequalled by any other class of plants. At our nursery you will find flowering and shade trees to suit almost any purpose. We will be happy to advise you as to the best kinds to suit your particular requirements.

BIRCH

A group or row or even a single specimen of Birch adds a graceful note to any landscape. The foliage is a pleasing green in summer, golden in the fall. In the winter the tracery of the graceful branches and the black-etched white bark form a very pleasing picture.

European White Birch. Everyone knows the White Birch with its beautiful white bark and black markings. Light green foliage. Rapid growth. Very attractive. 4-5 ft. \$1.75, 6-8 ft. \$2.75

Cutleaf Weeping Birch. Plant in groups or clumps. When sunlight filters through, it makes a beautiful display. Branches weeping and leaves deeply cut. Otherwise like the European White Birch. 4-5 ft. \$2.50, 6-8 ft. \$4.00

FLOWERING CHERRY

The extremely beautiful flowering cherries thrive in our climate and no gardener should pass up the chance to have one or more of these lovely trees in his yard. 4-5 ft. branched \$3.50, 6-7 ft. with 2-yr. top \$5.50. Other sizes available.

Mt. Fuji. Large double snow white flowers in pendant clusters. Rather spreading habit. A breathtaking sight when in full bloom.

Kwanzan. The large double pink flowers literally wreath the branches. One of the most spectacular cherries we have. Of rather upright growth.

Daybreak (Akebono). Called the most beautiful tree in the world, this erect growing tree is a cloud of pink every spring—no leaf showing.

Prunus Autumnalis. Small tree with semiweeping branches. Covered in late winter and early spring with pinkish flowers.

WEeping Flowering Cherry

These well known trees carry their bright pink blooms on pendulous branches that reach to the ground. A very popular yard tree. Available in single flowered and double flowered form. 2 yr. No. 1 \$6.50

BOX ELDER

Silver Variegated. A slow growing broad headed tree with pale yellow foliage splashed with green. A striking tree well adapted to planting as a lawn specimen. 3-4 ft. \$2.50, 5-6 ft. with 2-yr. top \$3.50

CATALPA

Catalpa speciosa, Western Catalpa. Large heart-shaped leaves cover this symmetrical tree, making a neat dense shade. Flowers lavender, quite large and great showy clusters. Fragrant. 6-8 ft. branched \$4.00

Typical Street Planting of Paul's Scarlet Hawthorn, Cutleaf Weeping Birch in Background, Boxwood Hedge Bordering Walk

FLOWERING CRABS

4-5 ft. branched \$2.50, 6-8 ft. with 2-yr. top \$4.50. Other sizes available.

Among the finest of all ornamental trees. In the spring the trees become a solid mass of bloom ranging in color, according to the variety, from white or delicate pink to glowing carmine. Because they remain small they are ideal for planting on the terrace.

Carmine Crab. A breathtaking splash of color in the spring with masses of brilliant carmine single blooms.

Dolga. Truly a fruiting variety, yet one of the most attractive when in bloom with rosy pink blossoms fading to white, followed by highly colored deep red fruit fully as ornamental as the blossoms. Fruit is highly prized for jelly making.

Hopa Crab. Rosy red flowers. Red fruits in fall.

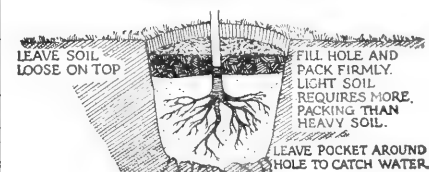

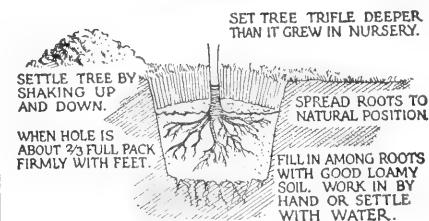

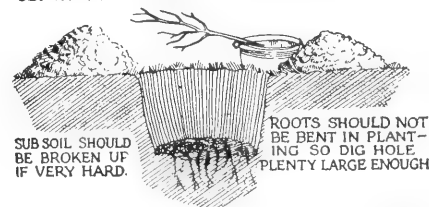

Eleyii Crab. A bronzy foliaged crab with deep rose flowers and dark red fruit.

Floribunda Crab. Small round-headed tree. The gracefully arching branches are densely wreathed with masses of pink buds and white flowers in spring.

Red Silver Crab. Attractive reddish or purplish-bronze foliage with slightly drooping branches.

How to Plant a Tree

SET TREE IN TUB OF WATER WHILE DIGGING HOLE.

IMPORTANT: WE DO NOT ENCOURAGE THE USE OF MANURE. IF WELL DECAYED AND MIXED WITH SOIL IT SHOULD BE USED ONLY ON THE TOP.

SILVER MAPLE

FLOWERING AND SHADE TREES

DOGWOOD

Florida. The famed white Dogwood of the eastern woodlands. Small much branched tree with myriads of clear white blooms in spring. Long-lasting flowers. Balled 3-4 ft. \$6.00

Florida rubra. The pink flowering form of the above. A really spectacular tree that never fails to draw admiration. Balled 2-3 ft. \$7.00, 3-4 ft. \$9.00

Pacific Dogwood. The special glory of the Northwest woodlands. Graceful tree covered with huge creamy "blossoms" in spring and occasionally bearing a liberal sprinkling of blooms in the fall. Balled 4-5 ft. \$4.50

GOLDENCHAIN TREE

Laburnum vossii. This grafted variety is exceptionally showy when in bloom—much superior to the common sort. Long racemes of golden yellow pea-shaped blossoms are suspended from branches covered with clover-like foliage. 4-5 ft. \$2.50, 6-8 ft. 2 yr. \$4.50

FLOWERING PLUM

Prunus blireiana. Brilliant red foliage which turns bronze later in the season. Masses of double soft pink flowers line the stem in spring. A very popular tree which supplies its full share of color to the spring landscape. 5-6 ft. \$3.75, 6-8 ft. 2 yr. \$4.50

Thundercloud. Clouds of pink blooms early in spring followed by rich red leaves which deepen to rich purple as the season advances. 5-6 ft. \$3.75, 6-8 ft. \$4.50

MAGNOLIA

Magnolia soulangeana. Masses of big lily-like blooms before the leaves appear in spring. Purplish outside, pale lavender or white inside. Balled, 2-3 ft. \$7.00, 3-4 ft. \$9.00

Magnolia grandiflora. Large evergreen tree with neat glossy foliage. The huge white fragrant water-lily-like flowers, often a foot in diameter, appear throughout the summer. Balled, 18-24 in. \$4.50, 3-4 ft. \$6.50

Magnolia rustica rubra. This variety has deep pink flowers. Vigorous growth. Balled, 3-4 ft. \$9.00

Magnolia stellata, Star Magnolia. Neat growing small tree or large shrub. Myriads of many-petaled white flowers 3 to 4 inches across in spring. Very choice. Pink forms available. Balled, 12-15 in. \$4.00, 15-18 in. \$5.00

MAPLE

Silver Maple. Very rapid growing large shade tree. The under side of the leaves are a silvery white, hence the name Silver Maple. Turns golden yellow in the fall. 6-8 ft. branched \$3.50

Norway Maple, Crimson King (Plant Pat. 735). A striking form of Norway Maple with the leaves a crimson color throughout the summer months. The stock of this much talked of tree is very small so we suggest ordering early. 6-8 ft. branched \$11.00

WEeping WILLOW

Golden Weeping Willow. Golden bark, graceful weeping habit. 8-10 ft. \$3.50

DWARF MAPLES

Red Laceleaf. A beautiful small shrub with deeply dissected fern-like leaves of deep red. 9-12 in. \$3.75

Blood Red. A deciduous variety that is slow growing. The small red leaves are deeply cut and sawtoothed. Can be used very effectively on north and east walls and in patios. 12-15 in. \$3.75

OAK

Quercus palustris, Pin Oak. Very fine street tree, tall with gracefully drooping branches. Deeply lobed, pointed foliage.

Quercus rubra, Red Oak. An excellent tree of rapid growth. Foliage turns russet and copper in autumn. 5-6 ft. branched \$5.00

SWEET GUM

Liquidambar styraciflua. Slow growing tree useful in parkway plantings or as lawn specimens. Clean neat growth. Glorious in the fall when arrayed in its autumnal orange, gold and red. 4-5 ft. balled \$5.50

SYCAMORE

Sycamore or Plane Tree. Handsome symmetrical shade tree. Foliage dense, light green, maple-like. Interesting greenish white mottled bark. 6-8 ft. \$4.50

TULIP TREE

Liriodendron tulipifera. A tall growing symmetrical tree. The cup shaped blooms are pale chartreuse. Balled, 4-5 ft. \$4.00, 5-6 ft. \$5.00

NOTE: Not to be confused with Magnolia which is also sometimes called Tulip Tree.

SWEETGUM (Liquidambar)

HAWTHORN

Paul's Scarlet Hawthorn. Masses of double carmine red flowers in spring. An excellent tree for small gardens and parking strips. White and pink available. 5-6 ft. 2-yr. top \$3.50, 6-8 ft 2-yr. top \$4.75

LOCUST

Moraine Locust (Pat. 836). New. A thornless, attractive vase-shaped Seedless Locust. A very hardy tree which grows well in either heavy or light soil and withstands drought or flood. 6-7 ft. branched \$8.00

FLOWERING CRAB

WHITE BIRCH (Betula alba)

PINK FLOWERING DOGWOOD

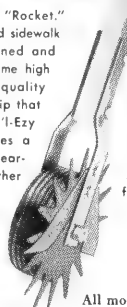

Double Flowering CHERRY, KWANZAN

BOX ELDER

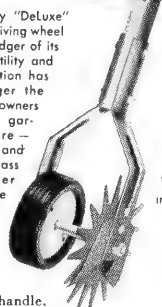

Rowe'l-Ezy All Purpose Lawn & Garden Edgers

Rowe'l-Ezy "Rocket."
Close coupled sidewalk
edger. Designed and
built to the same high
standards of quality
and workmanship that
go into all Rowe'l-Ezy
products. Features a
new Rowe'l-Ezy shear-
ing action; cuts either
forward or in reverse.

Model 30
\$3.95

CONIFERS for Rich and Varied Foliage Effects

The conifers listed here are all evergreen and all have either needle-like or scale-like leaves, and most all have cones for fruit, except Junipers and Yews, which bear berries. All forms and shapes are available from low spreading Junipers, formal little Arborvitae, through medium sized shrubs to very large trees. They are a hardy lot, thriving practically everywhere.

ARBORVITAE

Berckman's Golden Arborvitae. Popular dwarf golden variety. Tips of the branches bright golden yellow throughout most of the year.

12-15 in. \$3.00, 18-24 in. \$4.50

Pyramidal arborvitae. Fragrant foliage arranged on fan shaped branches. Makes an impressive tall column. Especially effective when planted as a hedge.

24-30 in. \$3.50, 3-4 ft \$5.00

CYPRESS

Elwoodi Cypress. Slow and dense growing, this is one of the finest evergreen shrubs available. It is always neat in appearance and the plummy soft evergreen foliage is attractive the year around.

15-18 in. \$3.25, 18-24 in. \$3.75

Birdsnest Cypress. The low spreading habit gives this unusual Cypress its very apt name. Very charming in appearance.

12-15 in. \$3.75

Hinoki Cypress. A rather slow growing conifer with distinctively articulated branching which is especially attractive. Lustrous rich green foliage. An exceptionally decorative conifer.

24-30 in. \$5.75

Stewart's or Golden Cypress. A dense symmetrical, pyramidal tree that keeps its golden color well in all seasons. Covered with lustrous rich foliage right down to the ground.

24-30 in. \$5.25

Golden Threaleaf Cypress. Pendulous thread-like branches with bright golden foliage give this conifer its name and highly individual character. Makes a well filled plant that never lacks interest.

12-15 in. \$3.75

CEDAR

Deodar Cedar, *Cedrus deodara*. Shapely graceful tree with light green foliage. The tips of the branches droop in a charming fashion. Becomes large tree.

24-30 in. \$3.50

Blue Mt. Atlas Cedar, *Cedrus atlantica glauca*. Stiff branches held somewhat upright until the trees are mature, well clothed with beautiful blue green needles. Very striking specimen.

2-3 ft. \$6.50

JUNIPER

Pfitzer's Juniper. Bushy wide spreading shrub with horizontal branches. Will reach a height of 4 or 5 feet with a 6 or 7 foot spread. Fine rich green foliage.

12-15 in. \$3.00, 18-24 in. \$4.25

Tamarix Juniper. Spreads close to the ground where it makes a low mat of silvery blue green foliage. Refined shrub for foundation planting, banks or ground cover.

9-12 in. \$2.00, 12-15 in. \$3.25

Meyer's Juniper. Silver blue foliage tinted violet in winter. A slow growing conifer of marked distinction.

15-18 in. \$3.75

Juniper Hetzi Glauca (New). Rapid, upright, spreading growth in shades of steel blue.

12-15 in. \$3.00, 18-24 in. \$4.25

PINE

Mugho Pine. Low dense mounds of upright stems thickly set with longish needles. A slow grower ideal for foundation plantings and particularly effective on rockwork. This choice conifer gives a very interesting texture and should be considered whenever conifers are indicated.

9-12 in. \$2.75, 12-15 in. \$3.50

SPRUCE

Colorado. Ample foliage of rich blue-green coloring. Plant very symmetrical. Lovely as a lawn specimen.

18-24 in. \$5.00

Norway Spruce. One of the best types for living christmas trees. Growth very symmetrical, opening enough to decorate with lights. Dark rich foliage. Moderate growth.

18-24 in. \$3.75

YEW

Choice evergreens sometimes adorned with red berries.

English Yew. The famous Yew of England. Dark green foliage. Available: Upright and spreading.

Upright, 24-30 in. \$5.50
Spreading, 18-24 in. \$5.50

Irish Yew. Narrow columns of beautiful foliage. Slow upright growth. An excellent plant for accents. Available in green and golden.

18-24 in. \$4.50, 3-4 ft. \$8.50

CEDRUS DEODARA

COLORADO BLUE SPRUCE

KILL SNAILS AND SLUGS WITH SNAROL: Proven SNAROL contains metaldehyde—a double acting bait that lures snails and slugs out of hiding and kills them! Convenient to use. Broadcast SNAROL Meal around flowers and shrubs. Scatter SNAROL Pellets where dense ground foliage is a problem. One pound of SNAROL (Meal or Pellets) treats a 1200 sq. ft. area.

1 lb. 35c; 2½ Lbs. 75c; 6 Lbs. \$1.65;
10 Lbs. \$2.50; 50 Lbs. \$10.75

NEW SURE WAY TO KILL LAWN AND SOIL INSECTS

Wipes out Lawn Moths, Ants, Earwigs and other pests that destroy grass. Contains Dieldrin, new lethal chemical. Granules reach soil where pests live. Safe to lawn, easier to use! No spraying, no mixing, no drifting. Just spread from Lawntrol box. (350 sq. ft. to 1 lb.) 1-lb. 69c, 2-lb. \$1.25, 5-lb. \$2.49

KILL APHIDS WITH ANTROL ROSE SPRAY: Just press the button—and poof! . . . your garden is rid of aphids, thrips and leafhoppers! And the long-lasting effect of scientifically combined Rotenone and Lindane in your easy to use ANTROL ROSE SPRAY kills pests long after spraying. Protects roses, dahlias, geraniums, camellias, chrysanthemums, carnations and other ornamentals.

12 Oz. \$1.49

WHAT AND WHERE TO PLANT

SHRUBS—VINES—CONIFERS—GROUND COVERS

To help you in selecting the proper shrubs and vines for your new home, or for replacing existing plantings that have outgrown their usefulness, we have compiled the following list of plant material. If you find varieties listed with which you are not familiar, we suggest you read carefully their descriptions (refer to index for page on which they will be found).

Practically all plants listed for sun will prove satisfactory if given half a day of sun and material for shade will generally tolerate morning and late afternoon sun.

Heights as indicated are necessarily approximate. See description.

Some varieties suitable for both sun and shade, as noted.

PLANTS FOR SUN	PLANTS FOR SHADY PLACES	FLOWER SHRUBS	INFORMAL (UNTRIMMED) HEDGES	FORMAL TRIMMED HEDGES

MANY ITEMS AVAILABLE IN CONTAINERS FOR PLANTING THE YEAR AROUND

Plant VINES

for Shade, Screening and Bloom

Vines add the finishing, softening, home-like touch to a house or garden. Use them to soften building lines, to shade a patio area, or employ the more rampant growers to screen out an unwanted view. They give personality to a garden—make it look lived in.

2-yr. No. 1 plants \$1.50 each, except as noted.

IVY

Boston Ivy. Small leaves set close together changing to rich crimson in fall. Makes an excellent cover which adheres to masonry walls.

Virginia Creeper, *Ampelopsis quinquefolia*. Large five fingered leaves turning intensely scarlet in fall. Rapid climber.

English Ivy. Evergreen vine with leathery, glossy leaves adapted to a wide variety of uses. Available in several varieties.

CLEMATIS

Clematis are dainty deciduous climbers prized for their lovely wide open blooms. Their colors span many shades from light blue to deep maroon.

1-yr. plants \$1.50

2-yr. plants in containers \$2.50 to \$3.50

Clematis armandi. An evergreen native of China with many white flowers in spring and vigorously climbing leathery foliage. Must have relatively frost-free location.

Clematis jackmanni. Purple. Attaining the height of 10 feet, it is a rapid climber and blossoms freely.

Clematis Henryi. Creamy white. The large white flowers and intense green foliage present a striking appearance. Blooms in early, and again in late, summer.

Clematis Mme. Edouard Andre. Red. Grows to a height of 8 feet. It is a free and persistent producer of crimson flowers from July to September.

Clematis montana rubens. Rapid growing, early blooming, with rosy flowers 1 to 2 inches across. Color changes to light clear pink as the flowers expand.

Clematis Nelly Moser. Mauve with red bars.

Clematis Ramona. Light blue. Grows from 8 to 10 feet. The blossoms appear in July and last for several weeks. Its clear sky blue flowers give it a charm all of its own.

HONEYSUCKLE

Lonicera belgica, Belgian Honeysuckle. Vigorous vine useful for its evergreen foliage and soil binding roots as a ground cover or on fences.

Lonicera heckrotti, Goldflame. Large clusters of brilliant pink and yellow fragrant flowers from spring until fall. Can be sheared into hedge form or grown as a vine or naturally shaped shrub.

JASMINE

Winter jasmine, *Jasminum nudiflorum*. Fragrant yellow flowers throughout the winter set off by the bright green stems.
White Jasmine, *Jasminum officinalis*. Ferny foliage and white flowers throughout the summer. Fragrant.

SILVER LACE VINE

Polygonum auberti. A rapid growing deciduous vine. Supplies panicles of fragrant flowers in late summer. Will cover a large area in a short time. Sun or part shade.

WISTERIA

Deciduous vine well known in all parts of the country for the long hanging clusters of pea shaped flowers of delicate coloring and exquisite fragrance. Makes a vigorous tracery of stems on arbors and in spring, before the leaves appear, a sudden burst of color. Available in Purple, White and Pink.

2-yr. \$2.50

TREE WISTERIAS AVAILABLE

Priced from \$7.50

FATSHEDERA

Lizei. Large dark green highly polished leaves.

CLEMATIS RAMONA

The uses of vines are almost unlimited, and they are readily adaptable to many different situations. Wisterias can be trained to conform to various types of supports; doorways, arches, pillars, trellises, arbors, even tree trunks, and should be pruned back to rather heavy wood each year for the finest effect. Many uses for Clematis will readily suggest themselves. They are specially desirable because of the long season of bloom that can be had by cutting back the vines after the first blooming period. Vines primarily grown for foliage effect can be very effective when two or more varieties are used on one wall. This gives a pleasing diversity of color and texture.

WISTERIA

CLEMATIS NELLY MOSER

PLANT THESE ROSES FOR CONTINUOUS BEAUTY

The established prices for all No. 1 top quality patented roses are the same throughout the entire United States. This is done to assure you of getting the exact rose you purchase and of the finest quality. The patented roses are the newer introductions which are highly perfected to give you beautiful blooms with the least effort. The prices are governed by the All-America Rose Selections committee and are designed to compensate the growers for the vast research they have accomplished to produce, for you, the finest roses possible.

PATENTED BUSH ROSES

RED

Bravo (Pat. 983). The sparkling, cardinal-red bloom will not fade in hottest weather. Mild fragrance. \$2.25.

Happiness (Pat. 910). A brilliant red rose with a coppery sheen. Especially fine for cutting. Gather while in bud and let them open indoors. Slightly fragrant. \$2.00.

Charles Mallerin (Pat. 933). A big deep velvety crimson rose that keeps its color. Richly fragrant, high centered blooms with 30 to 40 petals. \$2.50.

Chrysler Imperial (Pat. 1167). Vivid rich tones of crimson to glowing ox-blood red. Long tapering buds. \$2.50.

New Yorker (Pat. 823). Clear, large, sparkling red flowers, at least 6 inches across, and how beautiful! Fragrant. \$2.00.

President Eisenhower (Pat. 1217). The large, ovoid buds of this new rose open to 4 to 5 inch blooms of rich, unfading, rose-red of lasting brilliance, singly on strong stems. \$2.50.

MULTICOLOR

Forty-niner (Pat. 792). Brightly colored vivid red petals with yellow on outside. \$2.25.

Mark Sullivan (Pat. 599). Golden yellow, heavily veined with deep rose pink. \$1.75.

Mme. Henri Guillot (Pat. 337). Beautiful reddish orange with undertone of gold, opening to rich, deep pink. \$2.00.

Saturnia (Pat. 349). Petals cardinal red; salmon, yellow and copper reverse. \$1.75.

ORANGE

Fred Edmunds (Pat. 731). Burnt orange blended with rose, gold and salmon shades. \$2.00.

Mojave (Pat. 1176). Radiant orange, highlighted by flame-like tones of scarlet and vermillion. \$2.75.

WHITE

Blanche Mallerin (Pat. 594). Long, conical buds, and beautifully formed blooms of true white. \$2.00.

Rex Anderson (Pat. 335). Lemon tinted white buds open to perfect ivory white blooms. \$1.75.

PINK

Capistrano (Pat. 922). Deep, glowing rose pink in the bud and open flower. \$2.00.

Charlotte Armstrong (Pat. 455). Long, pointed buds of clear cerise-pink, opening to neatly tailored flowers. \$2.00.

First Love (Pat. 921). Long, slender bud and pastel shades of delicate pale orchid and rose dawn-pink. \$2.25.

Helen Traubel (Pat. 1028). The color varies with the weather from a light, sparkling pink to a luminous apricot. The magnificent buds are unusually large and long. \$2.50.

Show Girl (Pat. 646). Perfect phlox pink buds on long stems for cutting. \$2.00.

Suzon Lotthe (Pat. 934). Peach colored buds open to pearl pink flushed with deeper pink at the edges. A deliciously fragrant rose of charming color. \$2.00.

Tiffany (P.A.F.). Extremely large blooms and vigorous growth. The buds are long, pointed, golden yellow at the base, shading to a deep pink. The flowers open to perfectly formed, double, high centered blooms with petals of heavy texture and exceptional lasting qualities. \$2.75.

YELLOW

Burnaby (Pat. 1314). Classic 4 to 6 inch empire yellow blooms. Delicate fragrance and last well as a cut flower. Good exhibition rose. Tall grower (4½ feet) . . . Flower is large. \$2.50.

Golden Scepter (Pat. 910). A sparkling deep yellow rose with long buds and large high-centered blooms. Open growth. Dark glossy foliage. \$2.00.

Fred Howard (Pat. 1006). The long, rich yellow buds are tipped with a delicate penciling of light pink. \$2.00.

Peace (Pat. 591). Often a clear pleasing yellow, sometimes only yellow at the base, fading to a lighter tint and a delicate pink where the petals turn over. \$2.50.

Sun Valley (Pat. 1135). Warm, rich, radiant yellow flowers hold their tone in open blooms for days without fading. \$2.50.

Sutter's Gold (Pat. 885). Long pointed buds, deep yellow flushed with red, open to high centered blooms of orange to yellow with a flush of red. The most fragrant yellow rose. Excellent plant and vigorous growth. \$2.25.

GRANDIFLORA--A New Class of Roses

This new class of roses has been created to distinguish varieties which are hybrids between Hybrid Tea roses and Floribundas. They are intermediate in blooming habit and in size of bloom between the two types. Free blooming and carefree for massive displays.

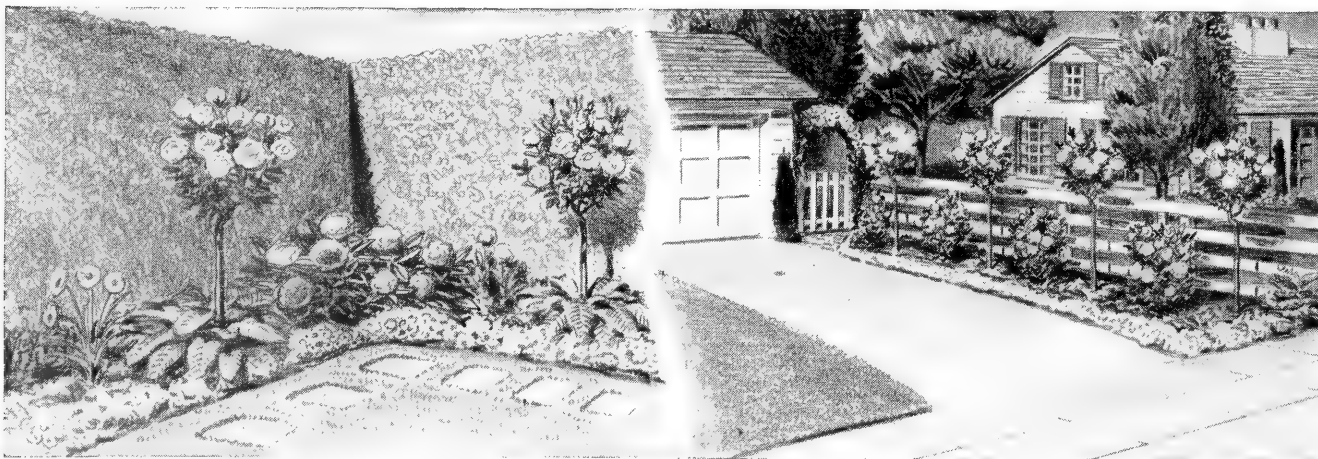

Buccaneer (Pat. 1119). Large urn-shaped buds and double blooms of clear lemon-yellow. The foliage is dark and leathery. \$2.50.

Carrousel (Pat. 1066). Dark red velvety blooms which resist bluing. Free blooming. Mildew resistant. \$2.00.

Montezuma (Pat. 1383). A striking new grandiflora with vivid scarlet-orange buds and large salmon-orange blooms in abundance. Vigorous. \$2.75.

Queen Elizabeth (Pat. 1259). 1955 All-America. A superb, delicate pure pink. The subtle blending of soft carmine and dawn pink is majestically set off by the deep green glossy foliage which clothes the vigorous bush right down to the ground. \$2.75.

Roundelay (P.A.F.). The delightful penetrating fragrance and excellent habit of growth make this one of the finest of the Grandiflora roses. It is a vivid red blooming in clusters on stout stems long enough to be perfect for cutting. \$2.75.

FLORIBUNDA AND POLYANTHA ROSES

Polyantha and Floribunda roses are cluster-flowered roses of bushy habit, blooming profusely over a long season. Invaluable for mass display of color. The Polyantha roses are lower growing. The Floribundas usually show more of the characteristics of the hybrid tea in the shape of the bloom and often in the foliage. Use them on banks, edgings, along driveways and walks, in front of the taller roses wherever a mass of color is desired. Floribundas are increasingly popular for patio decoration when planted in tubs.

Cecile Brunner. Small pink buds open to produce double flowers.

Corcorico (Pat. 1193). Three-inch blooms of blazing red, semi-double blooms with 5 to 9 broad velvety petals. Blooms continuously in well formed clusters. Bushy, upright 3-foot plants with good leathery, healthy foliage. \$2.00.

 **Fashion** (Pat. 789). A new color—rich salmon-orange. \$2.00.

Garnette. Dwarf, bushy plants only a foot and a half high. Dense clusters of garnet red blooms with lemon yellow base which retain their brilliance for a long time. \$1.50.

Lilibet (Pat. 1209). A dainty new floribunda featuring a long succession of perfect rose-pink to dawn-pink blooms. \$2.00.

Goldilocks (Pat. 672). Masses of golden yellow flowers all summer. \$1.50.

Frensham. Velvety deep scarlet blooms hold their color well. A beautiful hedge.

 **Jiminy Cricket** (P.A.F.). All-America Selections award for 1955. Masses of tangerine red buds open to a sharp coral orange or vermillion in the bloom and finish a pink coral. \$2.25.

Masquerade (Pat. 975). Yellow, pink and red roses all in one. The clusters of 10 to 25 blooms all display this amazing variety of colors at one time. \$2.00.

Pinocchio (Pat. 484). Clusters of dainty little flowers—salmon-orange flushed with gold. \$1.50.

Red Pinocchio (Pat. 812). Rich carmine which deepens and reveals a velvety over-cast as the bud opens. \$1.50.

 **Vogue** (Pat. 926). A unique brilliant cherry coral. Rich, spicy fragrance all through the season. \$2.00.

FLORIBUNDA PINOCCHIO (Pat. 484)

POPULAR NON-PATENTED BUSH ROSES

Price \$1.25 each, unless otherwise noted, 3 for \$3.55, 6 for \$6.75, 12 for \$12.75

Autumn. Burnt orange, streaked red.

Christopher Stone. Glowing crimson-scarlet, with deeper shadings.

Countess Vandal. Salmon pink.

Crimson Glory. Famous deep crimson.

Dainty Bess. Single, rose-pink.

Duquesa de Penaranda. Orange-apricot.

Eclipse. Long tapering yellow buds.

Ena Harkness. It's a vivid, poinsettia-like scarlet. Does not blue, fade or burn. \$1.75.

Etoile de Hollande. Glowing crimson.

Frau Karl Druschki. Popular everblooming white.

McGredy's Ivory. Long ivory white buds.

Mrs. E. P. Thom. Canary-yellow.

Mrs. P. S. Dupont. Long, reddish-golden bud; golden-yellow flowers.

Mrs. Sam McGredy. Fragrant blooms of scarlet, copper and orange.

Picture. Very double velvety rose-pink.

President Hoover. Shades of cerise-pink, orange and scarlet combined.

Talisman. Orange-scarlet.

The Doctor. Semi-double satiny pink.

HOW TO CARE FOR ROSES

THE TWO MOST IMPORTANT factors in rose growing are buying top grade plants, and proper planting.

Roses prefer an open area, free of tree and shrub roots, where they get half a day or more of sun, preferably morning sun. Keep roots moist and covered when planting.

Most any well drained soil, not too acid or alkaline can be made into good rose soil. Prepare the holes for planting well in advance. Dig holes 2 feet deep and 18 inches across. Add to surface soil 10% peat, 10% rotted manure and 5% rotted compost. Mix well. When planting re-dig holes, build a cone-shaped mound in the center, spread roots over cone; bud union (bulge on understock where top is budded on the stock) slightly above level of the ground. Fill in, firming with feet; water thoroughly.

Roses are heavy feeders. Fertilize from mid-March to mid-September, using ½ cup of a well-balanced fertilizer per plant. Dig a trench around plant, fill with water. When water settles place fertilizer in trench, fill

with water again and cover after water has settled. After first application of commercial fertilizer a mulch of well-rotted manure may be applied.

Roses require plenty of water. Keep beds moist at all times. Frequency depends on soil, from once or twice a week in sandy soil, to once in two weeks in heavy soil. Allow water to run slowly and soak deeply.

March is the best month for pruning bush roses in the Northwest. As much as possible cut out the old wood and shorten back the new growth about ½ of last year's growth. Cut out twiggy growth and cross branches. When cutting blooms leave 3 or 4 leaves with the top one pointing in the direction you wish the growth to go.

PRUNING CLIMBING ROSES. For the first two years after planting do not prune climbing roses. From third year on cut back all new growth ½ right after the flowering period. Climbers which bloom once each year bloom on wood produced the previous year. Prune these right after flowering to allow a good growth for next year's flowers.

CLIMBING ROSES

Beautiful subjects to train against walls on trellises or allowed to clamber over rough fences. They have been traditionally used on arbors and pergolas where the bloom can be seen at a distance and easily examined close by. Cut out old wood after blooming, thus encouraging new vigorous growth from the base. This will bloom the next season.

\$1.50 each, except as noted.

Cl. Cecile Brunner. Very popular climber. Vigorous with dainty pink blossoms.

Cl. Crimson Glory (Pat. 736). The most famous of all red roses. \$2.50.

Cl. Etoile de Hollande. Glowing crimson.

 **High Noon** (Pat. 704). Pillar rose to 8 feet high, covered with long stemmed golden yellow buds. \$2.50.

Improved Paul's Scarlet (Blaze). Semi-double blossoms of vivid scarlet borne in clusters.

Cl. Peace (Pat. 932). A sport of the bush rose Peace with all its vigor and beauty and lots more of those magnificent big blooms. \$2.00.

Cl. Picture (Pat. 524). Clear rose-pink with tones of warm salmon showing through. \$2.00.

Cl. Pinkie (Pat. 1076). Lovely pale pink. Blooms continuously spring to fall. \$2.75.

Ruth Alexander (Pat. 978). This rich toned beauty ranges from chromium yellow through orange and red. \$2.00.

BABY ROSES

Baby roses are ideal subjects for plant boxes as they grow only two feet high or so, and make almost solid masses of color. We recommend **Dick Koster**, salmon rose to orange; **Margo Koster**, coral pink camellia-like blooms; **Gloria Mundi**, glowing scarlet orange, and **Sparkler**, vivid red cupped blooms.

TREE ROSES or "standard" roses are much in demand for accent planting and for those who prefer their roses up high where they can be seen without bending over. They are the regular roses budded on straight clean stems of another variety. Keep all suckers cut off at the base of the cane and once a year thin out and shorten the head. Tree roses will add much to the interest and beauty of your garden. We stock a good selection in the most popular varieties.

FRUIT TREES for Your Home Orchard

A selection of fruit trees will add a great deal to the pleasure and utility of the home garden. Besides the undoubted advantage of having your own fresh fruit, picked at just the right time for peak flavor, your fruit trees will provide shade throughout the summer months and in the spring the fragrance and beauty of the blossoms come as an extra dividend.

FRUIT TREE PRICES

2 yr. old, 1 yr. top, 3/4 in. caliper, \$1.75
2 yr. old, 2 yr. top, 1 1/16 in. caliper, \$2.50
3 yr. old, 2 yr. top, 1 in. up caliper, \$3.50

DWARF FRUIT TREE PRICES

Trees with branched tops.
2 yr. Junior size, 3/8 to 1/2 in. caliper, \$2.50
2 yr. Senior size, 1/2 in. up caliper, \$3.50

APPLES

Summer Varieties

- ✓ **Yellow Transparent.** A pale yellow apple with mild tender flesh. The standard early apple. July.
- ✓ **Gravenstein.** Red striped crisp, juicy apple highly prized for pies and as an eating apple. August and September.

Fall Variety

- ✓ **King.** Large yellowish green fruits striped with red. A favorite for baking and eating uncooked.

Winter Varieties

- ✓ **Jonathan.** Medium to large, almost round, brilliant red striped with carmine. Crisp white juicy flesh.
- ✓ **Northern Spy.** Large greenish yellow fruits with red stripes. A favorite for cooking and eating. Keeps well.
- ✓ **Red Delicious.** Strong red waxy skin; delicious flavor, large crisp and juicy. One of the finest red apples.

✓ **Red Rome Beauty.** Large round long stemmed fruits of beautiful red coloring. Flavor and quality far above average. Excellent keeper.

✓ **Stayman Winesap.** Improved type of Winesap, larger and more prolific. Large, yellow splashed with red. Tart, crisp, fine for eating.

✓ **Yellow Delicious.** Large, golden yellow, crisp, firm and delicious. A fine apple for all purposes. Yellow Delicious is a good pollinizer and makes a good addition to any home apple planting.

CRAB APPLE

✓ **Transcendent.** A beautiful variety of Siberian crab; large, yellow with red cheeks. Fine for jelly or spicing.

APRICOT

✓ **Perfection.** Large, well flavored fruits. A heavy producer and the best all around Apricot. Requires a pollinizer.

✓ **Tilton.** Fruit medium size, rich apricot color, flavor of the highest quality. Bears immense crops. Good for canning or eating fresh.

✓ **Moorpark.** One of the largest Apricots. Color deep apricot. Flesh firm, juicy and parting from the pit, pleasant, sweet flavor.

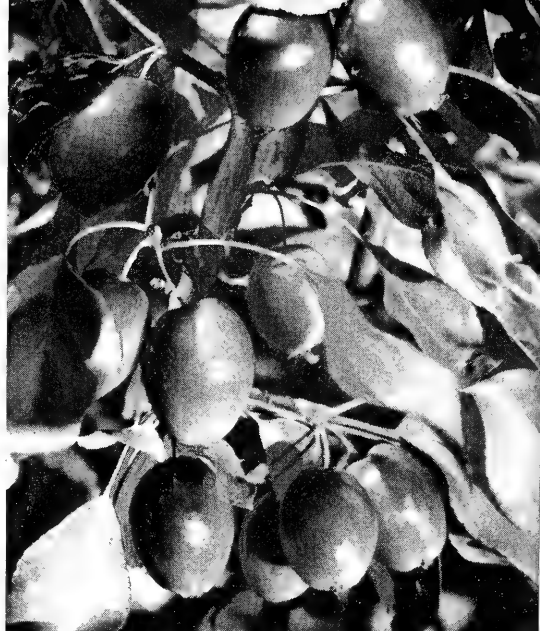

CHERRIES

Sweet Cherries

- ✓ **Bing.** Large, delicious, dark red, with rich, firm, purplish flesh. Excellent for eating, canning and preserves.
- ✓ **Deacon.** Large purplish black fruits of good flavor. Pollinizer.
- ✓ **Lambert.** Large dark red fruits of superior texture and flavor. Small seeded.
- ✓ **Royal Anne.** Large sweet light yellow fruits with red cheek. Solid, richly flavored. Excellent for canning.

Sour or Pie Cherry

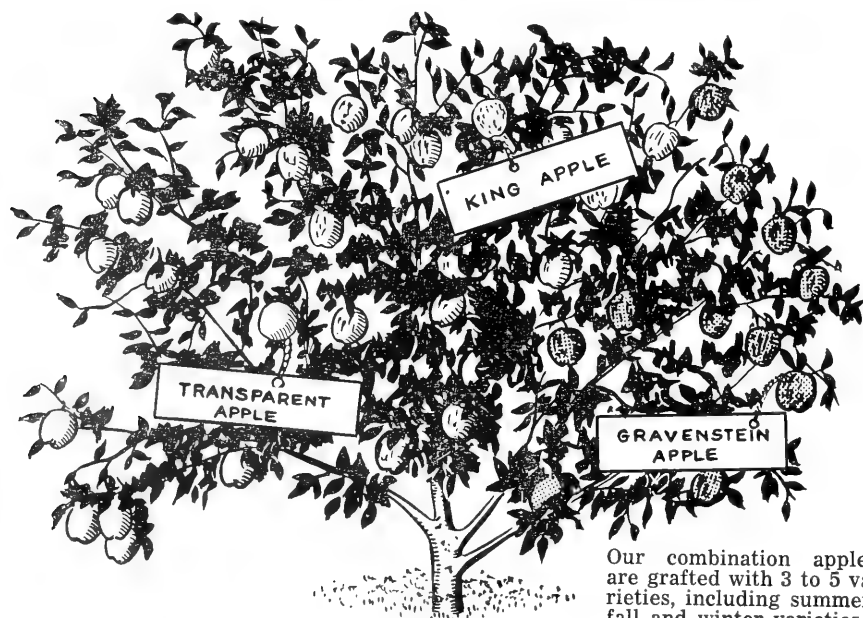

✓ **Montmorency.** The leading pie Cherry. Produces a good crop of large, red, well flavored red fruits every year. Crops heavily and bears while young.

DOLGA CRABAPPLE

PEACHES

- ✓ **Red Haven.** A new early yellow freestone peach of medium size. Attractive fruit with firm flesh. A home canning peach of high quality.
- ✓ **Rochester.** Sweet juicy flavorful fruits, rich orange and yellowish color.
- ✓ **Veteran.** Large round golden yellow fruits with good sweet flavor. Excellent for canning and freezing.
- ✓ **Improved Early Elberta.** The most used canning peach. The rich yellow fruits, heavily flushed pink, are borne in great abundance.
- ✓ **Pacific Gold.** A heavy bearing peach of fine appearance especially well adapted to Western Washington growing conditions. Rounded red and yellow fruits of good quality. Ripens about mid-August.

Our combination apples are grafted with 3 to 5 varieties, including summer, fall and winter varieties.

✓ **DWARF FRUIT TREES** are ideally suited to the small property. They bear regular full sized fruit on trees much smaller than the standard fruit trees and come into bearing at a much earlier age. We can supply dwarf fruit trees in most of the varieties listed on these pages and strongly recommend the dwarf apples and pears.

✓ **ESPALIER FRUIT TREES** are valuable for their ornamental effect as well as being quite practical as fruit producers. May be planted against walls, or fences. Because of their shape they occupy very little space.

COMBINATION FRUIT TREES

Grafted with three or more varieties on one tree these are especially valuable for the small yard. These trees are a constant source of interest and make very desirable shade trees.

- ✓ **Dwarf:** 3 varieties \$6.00, 4 varieties \$7.50
- ✓ **Standard:** 3 varieties \$4.50, 4 varieties \$5.00

Washington

Dear Friend:

To introduce you to Bushberry,
we would like to tell you a little bit about our
beginnings.

The Nursery started in 1928 and has
operated continuously ever since.

Trees which are grown exclusively by
our Nursery are:

1. Pacific Gold Peach. This is the
first peach propagated for Western
Washington. Semi-cling, juicy and
very sweet. Bears young and is
very prolific.
2. Rosy Dawn Peach. Medium size, free
stone with very rich flavor. Best of
all canners.
3. Shout Peach. Large, yellow, comparable
to Veteran. Fine textured flesh.
4. Jeanes Apricot. Large, yellow, with
red cheek. High flavored and a good
canner. Blooms later than most cots.
5. Buckley Giant Apple. Extra large, ripens
in mid-September. Annual bearer; its
first crop often on two year old trees.
Fruit crisp, striped with pink cheek;
unexcelled both for eating and cooking.
6. Schsat Delicious apple. Not available at
this time.

We are also developing at this time a sweet cherry not as
yet named and which will be in the experimental stage for
several years yet.

We also have a complete Garden Store, Gift Shop,
Nursery and Landscape Service.

We are just off Highway 410 between Sumner and
Puyallup and we are open 8 days a week.

FRUIT, SHADE AND NUT TREES

SHRUBS — EVERGREEN — ROSES

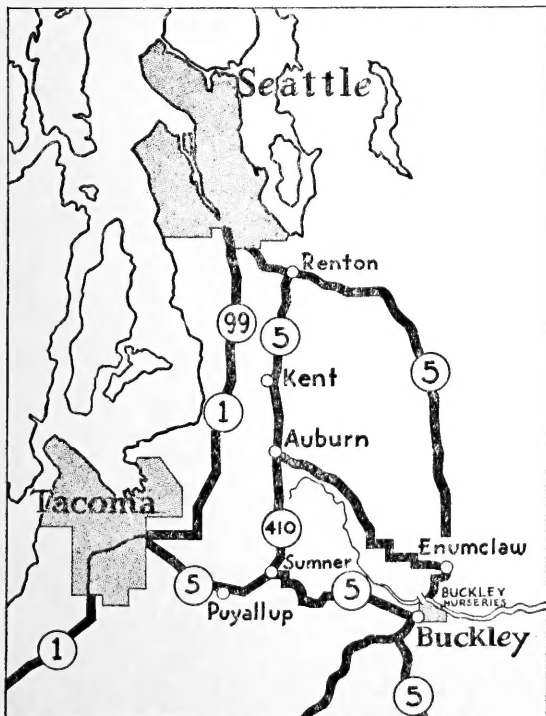

VINES — BERRIES

NOW - SPECIAL FREE LANDSCAPE OFFER!

Plan Now To Add To The Value Of Your Home!

Plant to a plan! Call at our nursery and let our experts assist you. We have the largest stock of fruit trees in Western Washington. A complete line of all varieties of Evergreens, roses, flowering shrubs and shade trees. The quality of our stock will please you. Write for our big catalog! We make regular truck deliveries in all of the major cities of Western Washington, and also make prompt shipment by parcel post, express and auto freight. When calling at the nursery or when writing send, or bring a picture of your home and get a free plan of the front of your home, showing a recommended placing of shrubs about it. **THERE IS NO CHARGE OR OBLIGATION FOR THIS SERVICE!!!** Send picture and measurements showing width of doors and windows plus overall measurement to LANDSCAPER, BUCKLEY NURSERY COMPANY, Buckley, Washington.

Are You Loggin' or Livin'?

SHRUBS AROUND A HOUSE are like furniture in the house. Eventually they do outlive their usefulness and are a detriment to the looks of the property. While proper pruning will keep many shrubs at their peak of beauty for numerous years, some of them will 'get away' and get large enough to be 'logged off'. Many an attractive home loses its inviting look through overgrown shrubs. Frequently the larger shrubs around the front of a home can be salvaged and moved to other locations in the yard where they can be used for their screening value to insure privacy. The actual cost of new shrubs to give the house a 'new look' is very low, and in almost every instance the increased value of the property is double or triple the amount invested in the proper shrubs to 'dress up' the home. From a picture of your home our experts can advise you as to the best method to increase the 'liveability' of your house. If you prefer, arrangements can be made for one of our representatives to call and give personal advice.

Plant A Tree

WITH THE PRESENT ADVANTAGES of dwarf trees and combination trees which combine two or more varieties of apples, pears, or cherries on a single tree, every yard is large enough for at least one fruiting tree.

Many of the fruiting sorts, such as apple, peach, cherry and plum are as ornamental with their colorful blossoms and fruit as some of the regular shade trees.

Selection should be made according to space available and results desired. Let our experts help you with your planting problems. There is no charge for the recommendations as to best sorts to suit your particular needs. Whether you need a single tree or an orchard our trained men are glad to assist you in selecting the tree or trees which will best serve to give you the most satisfaction in future years.

Planting a tree is an investment in the future. No other expenditure increases in value from day to day as does a GROWING, LIVING, tree, shrub or plant. INVEST your dollars in the future by planting Buckley Nursery Company, sure-to-grow nursery stock.

PEARS

Summer Pears

- **Bartlett.** Large smooth waxy yellow fruit with white sweet flesh. Plant with an Anjou pear for a pollinizer.
- **Red Bartlett (Pat. 741).** In quality, shape and size identical to the popular Bartlett, but it has about 10% more sugar content. Cherry-red after storage.
- **Clapp's Favorite.** Large fruit with fine, grainless texture. Pale lemon yellow with slight blush. Tree hardy, productive.

Winter Pears

- **Anjou (Buerre d'Anjou).** Fine large fruits with sprightly flavor and buttery texture.
- **Comice (Doyenne du Comice).** A famed dessert pear with white, sweet, fine grained, tender flesh. The fruits are rich yellow with a crimson touch at maturity.

PLUMS

- **Santa Rosa.** Large, oval, purplish crimson fruit. Flesh firm, purplish and pink, veined yellow, of excellent quality.
- **Peach Plum.** An old favorite with large round early ripening fruits. Flavor rich and lively.
- **Satsuma.** Large, nearly round dark red fruits, solid red color from skin to pit. Flesh firm and juicy.
- **Yellow Egg.** Large long oval fruit of clear golden yellow. Skin thin; flesh golden yellow, juicy and firm.

PRUNES

- **Italian.** Purple oval fruits with sweet juicy flesh of distinctive flavor. The favorite prune in our area.

SMALL FRUITS and NUTS

6 or more plants less 10% except Strawberries. This applies to your total fruit order.

GRAPES

2-yr. No. 1 plants 75c

- **Caco.** A new wine red grape of exceptional merit. Good sized fruits in compact bunches. Ripens Aug. to Sept.
- **Campbell's Early (Island Belle).** Large clusters of black berries with a blue bloom. An extra good keeper and very popular with the home gardener.
- **Concord.** A sweet richly flavored black grape. One of the most widely grown grapes in America. Fine for juice and jelly.
- **Fredonia.** Medium sized compact clusters of sweet juicy black berries. Ripens about two weeks ahead of Concord.
- **Portland.** A productive early green grape with tender juicy sweet berries. The leading early green grape for this section.
- **Seneca.** A very early white grape with good sized sweet juicy berries.
- **Worden.** Seedling of the Concord, which it greatly resembles in appearance and flavor.

BLUEBERRIES

Now one of the most popular small fruits in this region. Delight in acid soil and abundant moisture. Plant about 4 feet apart and to insure pollinization plant at least two varieties.

2-yr. old \$1.25, 3-yr. old \$1.75

- **Concord.** Mid-season. Plants tall and vigorous, fruits large, of excellent flavor.
- **Jersey.** Large sized berries, very sweet. Vigorous bush.
- **Rubel.** Produces enormous crops of medium sized berries. Good flavor.

Other varieties available.

BOYSENBERRY

Huge black berries of pleasing flavor. Bears heavily over a long season, even while plants are young.
40c

NECTARBERRY

Similar to the Boysenberry but sweeter and deeper in color. Vigorous and productive.
50c

CASCADE BLACKBERRY

A cross of the Loganberry and the true wild Blackberry. Excellent for jellies, jams and pies.
50c

THORNLESS LOGANBERRY

A very productive Loganberry. Distinctive flavor.

GOOSEBERRY and CURRANT

➤ **Gooseberry.** A favorite for pies and preserves.
50c

➤ **Currant.** Clusters of beautiful red berries. Highly esteemed for jellies.
50c

STRAWBERRIES

➤ **Northwest.** The new yellows resistant Marshall strain strawberry. Produces large flavorful fruits similar to Marshall. 25 for \$1.50, 100 for \$4.75

➤ **Marshall.** High quality home canning and commercial variety. Fine for dessert, canning or freezing.
25 for \$1.50, 100 for \$4.75

➤ **Red Rich (Pat. 993).** A true everbearer with the biggest, reddest, sweetest fruits you ever saw. Perfect for freezing. Bears from spring right through summer and into fall.
25 for \$5.00, 100 for \$15.00

➤ **Rockhill (Everbearing).** Bears young and over a long season. Very productive of its sweet rich - red - berries. Doesn't make runners.
25 for \$3.00, 100 for \$10.00

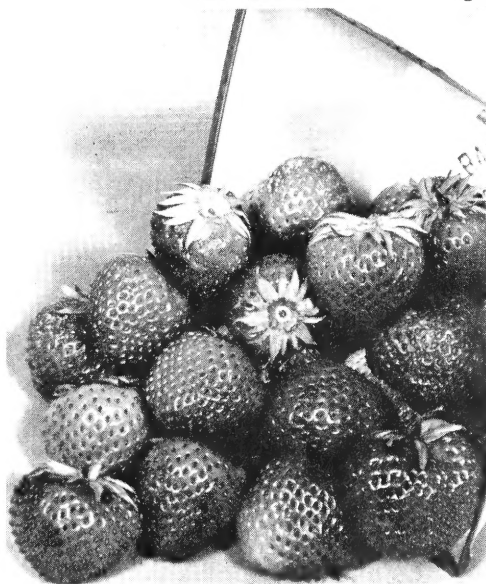

FILBERTS

3-4 ft., 2-yr., \$2.25

➤ **Barcelona.** A large round nut that drops freely from its husk. The richly flavored kernels are uniform in size. Plant with Du Chilly to insure pollinization.

➤ **Du Chilly.** A large long nut used much as a pollinizer. Nuts of excellent flavor and highest quality.
